Agricultural Statistics of India

1933-34

VOLUME I—BRITISH INDIA

Introductory Note

This annual volume is the fiftieth of the series started in 1886 with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in Summary table No. 1, for five years in the provincial tables and for two years in the district tables. A map showing the departure from the normal of sown area and that of rainfall in 1933-34 and other charts as detailed in the last paragraph of this note have, as usual, been incorporated in the volume. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States * as far as they are reported.

The statistics are compiled from annual returns furnished by the Governments of Bengal, Bombay, Madras, the Central Provinces, the United Provinces, and Assam; the Commissioner, Coorg, the Revenue and Divisional Commissioner, North-West Frontier Province, the Commissioner, Ajmer-Merwara, the Commissioner of Settlements and Land Records, Burma, the Director of Agriculture, Bihar and Orissa, the Director of Land Records, Punjab, and the Deputy Commissioner, Delhi.

The statistics are given in seven separate tables, namely, I—Area; II—Classification of area; III—Area under irrigation; IV—Area under crops; V—Live-stock, ploughs, and carts; VI—Land Revenue assessment; and VII—Harvest prices. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are three appendices, namely, Appendix A, dealing with the average yield per acre of principal crops; Appendix B, giving the meaning of vernacular terms used in the volume; and Appendix C, containing an alphabetical list of crops cultivated in India and their classification in Table IV.

The year to which the returns relate ends on 30th June, this being the generally recognised agricultural year, except in Assam where the year ends on 31st March and in the Central Provinces and Berar where it ends on 31st May. It should, however, be borne in mind that statistics relating to areas irrigated (Table III) and areas under crops and specification of crops (Table IV) generally include both the *kharif* (autumn) and the *rabi* (spring) crops, and therefore actually relate to the year ended with the harvesting of the *rabi* or spring crops.

* In Appendix A (Volume I), however, figures relating to the Mysore State are shown separately.

area and
population of India

The total area of India is 1,816,000* square miles, or 1,162,383,000 acres with a population of 353 millions according to the census of 1931. This may be divided as follows :—

	Acres	Population
(1) British Provinces (including Indian States within the political jurisdiction of Local Governments and Administrations)†	686,891,000	274,382,000
(2) Indian States having direct political relations with the Government of India	426,250,000	75,800,000
(3) Certain specially administered territories in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	14,536,000	2,102,000
(4) British Baluchistan (including administered areas)	34,706,000	464,000
Total	<u>1,162,383,000</u>	<u>352,757,000</u>

No returns of agricultural statistics are prepared either for item (3) certain specially administered territories in the North-West Frontier Province, or for item (4) British Baluchistan.

The total area of the British Provinces (item 1 above) shown in this volume—686,891,000 acres or 1,073,000 square miles—includes 19,557,000 acres, with a population of some 3 millions, belonging to Indian States, which are within the political jurisdiction of Local Governments and Administrations. These States comprise Manipur and the Khasi and Jaintia Hill States in Assam; Cooch Behar and Tripura in Bengal; Rampur, Tehri, and Benares in the United Provinces; the Ambala Division States and the Simla Hill States in the Punjab; the Amb and Phulera (Feudal Tanawal) States in the North-West Frontier Province. Of these States, agricultural statistics are prepared for most of the States in the Punjab and the United Provinces; but they are dealt with in Volume II along with the States having direct political relations with the Government of India (item 2).

Thus, deducting 19,557,000 acres belonging to Indian States from the total area of 686,891,000 acres included in British Provinces, the remainder, 667,334,000 acres, is shown in Table I, and this represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the southern Presidencies. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from "village papers", *i.e.* papers prepared by the village accountants for the purpose of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the surveyed area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail-roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 660,865,000 acres, as against 667,334,000 acres according to professional survey.

* The difference between this area and that shown in the Census report of 1931 is due mainly to the exclusion of certain tracts of Burma, especially Putao, from the Census return. A considerable part of Putao amounting to over 6 million acres is excluded from the Census report.

† The Indian States in the Bombay Presidency, the Tributary States of Orissa and Chota Nagpur in Bihar and Orissa and the Chhattisgarh States in the Central Provinces have been excluded from item (1) and shown under item (2), as these States have since been placed under direct political relationship with the Government of India from 1st April, 1933.

This area is, for the purpose of Agricultural Statistics, classified as Table II shown in the margin. Of the total area, 89,067,000 acres, or 13 per cent, are occupied by forests; and the area not available for cultivation, *i.e.*, land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 144,650,000 acres, or 22 per cent. The balance, 433,148,000 acres, or 65 per cent, represents the area available for cultivation. Of this, 153,449,000 acres, or 23 per cent of the total area, represent culturable waste other than fallow, *i.e.*, land available for cultivation but not taken up or abandoned, and 47,453,000 acres, or 7 per cent, land kept fallow in the year of report. The net area actually sown with crops during 1933-34 was therefore 232,246,000 acres, or 35 per cent of the total area, as against 228,076,000 acres in the preceding year. If, however, areas sown more than once during the year are taken as separate areas for each crop, the gross area sown in the year of report amounts to 267,160,000 acres, as against 260,391,000 acres in the preceding year. The proportion of the net sown to total area and the number of population per 100 acres of sown area in each province are stated in the margin. The proportion of sown to total area in the year under review was highest in Delhi and lowest in Burma and the population per unit of sown area was largest in Delhi and smallest in Bombay.

	Acres (1,000)	Per cent
Forests	89,067	13.4
Not available for cultivation	144,650	21.7
Culturable waste other than fallow	153,449	23.0
Current fallows	47,453	7.1
Net area sown	232,246	34.8
Total	666,865	100

	Proportion of sown to total area	Population per 100 acres of sown area
Delhi	58 per cent	299
United Provinces	53 "	134

Assam	17 "	143
Coorg	13 "	119
Burma	12 "	80
British India	35 "	115

The term "forests" in the returns of Agricultural Statistics means "any land classed or administered as forest under any legal enactment dealing with forests". Any cultivated area existing within such forests may, however, be excluded from that head and entered in the column "net area sown." The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the Administration of the Forest Department for various reasons,* the chief amongst which are (1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, local boards, municipalities, etc., and (3) certain village and other lands not covered by forests but worked by the Forest Department and returned as forest lands by that Department, are not treated as forests in the returns of agricultural statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (89,067,000 acres in 1933-34), 25 per cent lies in Burma, 18 per cent in the Central Provinces and Berar, 15 per cent in the Madras Presidency, 11 per cent in the United Provinces, 10 per cent in Bombay, and the remaining 21 per cent in the other provinces.

Most of the barren and unculturable lands lies naturally in the hilly tracts of Burma and of southern India and in the dry and desert regions of north-western India. Burma contains 36 per cent of the total area under the head "not available for cultivation" (144,650,000 acres in 1933-34), Madras 14 per cent, Bombay 13 per cent, and the Punjab 9 per cent.

The head "culturable waste other than fallow" shows lands available for cultivation but not taken up or abandoned. It includes areas such as groves not classed in the area sown and also areas under bamboos and thatching grass

* For detailed information in respect of provinces, see notes at the foot of Table II, Nos. 21 to 32.

when not forming parts of forest areas.* Of the total culturable waste land (153,449,000 acres in 1933-34), 39 per cent was in Burma, 12 per cent in Assam, 9 per cent each in the Punjab, the Central Provinces and Berar, and the Madras Presidency, and the remaining 22 per cent in the other provinces.

Current fallows

The maximum period for which land left uncultivated is reckoned as fallow varies according to local laws and customs in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in the Bombay Presidency. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste". Owing to this diversity of practice, the classification of area as "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in the Bombay Presidency, but as culturable waste in the Punjab. The total area returned as "current fallow" in 1933-34 was 47,153,000 acres, as against 50,693,000 acres in the preceding year.

Table III
Irrigation

The total area irrigated in 1933-34 was 50,508,000 acres, as against 49,882,000 acres in the preceding year. Of this area, 22,969,000 acres were irrigated from Government canals, 3,863,000 acres from private canals, 11,371,000 acres from wells, 6,553,000 acres from tanks, and 5,752,000 acres from other sources of irrigation. In India irrigation is ordinarily resorted to on an extensive scale in tracts where the rainfall is most precarious. In Lower Burma, Assam, eastern Bengal, and the Malabar Coast (including the Konkan),

	Proportion of irrigated to total sown area
Punjab	50 per cent
North-West Frontier Province	42 "
Ajmer-Merwara	40 "
United Provinces	28 "
Madras	27 "
Delhi	13 "
Bihar and Orissa	21 "
Bombay	16 "
Assam	10 "
Burma	9 "
Bengal	7 "
Central Provinces and Berar	4 "
Coorg	3 "

where the rainfall is ordinarily heavy, the crops hardly need the help of irrigation, unless there is an unusual scarcity of rain. Of the total area irrigated in 1933-34, the Punjab accounted for 29 per cent, the United Provinces 20 per cent, the Madras Presidency 18 per cent, Bombay 11 per cent, Bihar and Orissa 10 per cent, and the other provinces the remaining 12 per cent. The proportion of irrigated to total area sown in each province is stated in the margin.

The above figures of irrigated areas do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas sown more than once as separate areas for each crop, the gross area of irrigated crops was 54,683,000 acres in 1933-34. Of this area, 81 per cent was under food crops and the remainder under non-food crops. Of the former, 19,235,000 acres were under rice, 11,031,000 acres under wheat, 2,555,000 acres under barley, 1,347,000 acres under jowar, 1,057,000 acres under bajra, 871,000 acres under maize, 1,921,000 acres under sugarcane, and the remaining 8,060,000 acres under other food crops. Of the irrigated non-food crop area, 3,475,000 acres were occupied by cotton. These statistics of irrigated crops are in some cases defective as explained in the notes at the foot of Table III (pages 64-114).

Table IV
Area under crops

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are framed on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements,

* For detailed information in respect of provinces, see notes at the foot of Table II, Nos. 21 to 32

is assigned to the principal crops by the village accountant. In the same province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains, and in this case the whole area of the mixed field is assigned to food-grains.

			Classification of area sown
	Acres (1,000)	Per cent of total	
Food-grains	206,223	77.2	about 217,665,000 acres, or 81.5 per cent and non-food crops 49,495,000 acres, or 18.5 per cent. Of the food-crops, food-grains (cereals and pulses) covered as much as 206,223,000 acres†, or 77 per cent of the total area sown, and other food-crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops* together) some 11,442,000 acres, or a little over 4 per cent of the total. Of non-food crops, fibres (such as cotton, jute, hemp, etc.)
Condiments and spices	1,467	0.5	
Sugar	3,364	1.3	
Fruits and vegetables	4,855	1.8	
Miscellaneous food-crops	1,756	0.7	
Total food-crops	217,665	81.5	
Oilseeds	17,794	6.7	occupied 17,626,000 acres and oilseeds 17,794,000 acres ‡, or about 7 per cent. of the total area sown in each case. The other non-food crops*—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied about 14,075,000 acres, or 5 per cent of the total.
Fibres	17,626	6.6	
Dyes and Tanning materials621	0.2	
Drugs and narcotics	2,241	0.8	
Fodder crops	10,207	3.8	
Miscellaneous non-food crops	1,006	0.4	
Total non-food crops	49,495	18.5	

occupied 17,626,000 acres and oilseeds 17,794,000 acres ‡, or about 7 per cent. of the total area sown in each case. The other non-food crops*—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied about 14,075,000 acres, or 5 per cent of the total.

The area under food-grains (206,223,000 acres) showed an increase of 4,760,000 acres, as compared with the preceding year. The actual increase or decrease

	1933-34	1932-33	Increase (+) or Decrease (—)	Food grains
	Acres (1,000)	Acres (1,000)	Acres (1,000)	
Rice	80,425	79,968	+457	under each kind of food-grains is stated in the marginal table. It will be seen that the increase occurred mainly under gram, wheat and rice. Of the total area shown in the table under food-grains, 18 per cent was in the United Provinces†, 14 per cent in the Madras Presidency, 12 per cent each in the Punjab, Bihar and Orissa, and Bombay,
Wheat	27,598	25,014	+2,584	
Barley	6,724	6,405	+319	
Jowar	21,401	21,462	—61

Other oilseeds	1,134	1,111	+23	

Provinces‡ and the remaining 3 per cent in other tracts.

* For a list of these crops, vide Appendix C.

† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated at 4 million acres in the whole province in 1933-34. Excluding this area of 4 million acres under oilseeds, the total area under food-grains in British India in 1933-34 would come to 202 million acres instead of 206 million acres.

‡ The figures shown under the several heads of oilseeds in Table IV against the United Provinces represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other food-crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1933-34 for the whole of the United Provinces to 4 million acres. Including this area, the total area under oilseeds in British India in 1933-34 would come to about 22 million acres.

Condiments and spices

The total area under condiments and spices in 1933-34 was 1,467,000 acres, as against 1,551,000 acres in the preceding year. Spices are grown mostly in the southern parts of India. the Madras Presidency alone accounting for 16 per cent of the total area under condiments and spices in 1933-34.

Sugar

The total area occupied by sugar-yielding plants in 1933-34 was 3,364,000 acres, as against 3,367,000 acres in the preceding year. Of this area, 3,198,000 acres were under sugarcane, as against 3,201,000 acres in the preceding year. Of the sugarcane area, 54 per cent was in the United Provinces, 15 per cent in the Punjab, 13 per cent in Bihar and Orissa, 8 per cent in Bengal, and 4 per cent in the Madras Presidency. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 166,000 acres, which is slightly less than in the preceding year. Of this area, the Madras Presidency accounted for 54 per cent and Bengal 33 per cent.

Fibres

Fibre crops occupied 17,626,000 acres in 1933-34, as against 15,667,000 acres in the preceding year, an increase of 1,959,000 acres. The actual increase or decrease under the several kinds of fibres is shown in the marginal table.

	1933-34	1932-33	Increase (+) or Decrease (-)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Cotton	14,409	13,122	+1,287
Jute	2,494	1,877	+617
Other fibres	633	668	-35

The area under cotton showed an increase of 10 per cent. Of the total cotton area, 20 per cent each was in Bombay and the Central Provinces and Berar, 17 per cent in the Punjab, 15 per cent in the Madras Presidency, and 6 per cent in the United Provinces. The area under jute showed an increase of 33 per cent. Of the total jute area, 86 per cent was in Bengal and the remainder was practically confined to the adjoining provinces of Bihar and Orissa and Assam. Other fibres together showed a decrease of 5 per cent as compared with the preceding year.

Dyes and tanning materials

The total area under dyes and tanning materials was 621,000 acres in 1933-34. Of this, the area under indigo—the cultivation of which is fast declining—was 42,000 acres, showing a decrease of 19,000 acres, or 31 per cent. Other dyes and tanning materials covered an aggregate area of 579,000 acres.

Drugs and narcotics

Drugs and narcotics occupied 2,241,000 acres in 1933-34, as against 2,276,000 acres in the preceding year. The actual increase or decrease under each kind of drugs and narcotics is stated in the marginal table. There has been no remarkable variation in the areas under the crops included under this head.

	1933-34	1932-33	Increase (+) or Decrease (-)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Opium	18	31	-13
Coffee	95	93	+2
Tea	780	775	+5
Tobacco	1,085	1,117	-32
Other drugs and narcotics	263	260	+3

Fodder crops

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, fodder jowar, and carob or locust tree. The total area under fodder crops in 1933-34 was 10,207,000 acres, as against 9,989,000 acres in the preceding year.

Fruits and vegetables including root crops

The total area under fruits and vegetable crops in 1933-34 was 4,855,000 acres, as against 5,006,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see footnotes on page 121 and Appendix C.]

Miscellaneous crops

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,762,000 acres. Of this 1,756,000 acres were occupied by miscellaneous food-crops and 1,006,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on page 121 and Appendix C.]

Area sown more than once

The total extent of land on which more than one crop was cultivated during the year was 34,914,000 acres, as against 32,315,000 acres in the preceding year.

The statistics recorded in Table V are based on cattle censuses. The census is taken annually in certain provinces and quinquennially in others*. The first general quinquennial census was taken in 1919-20, the second in 1924-25 and the third in 1929-30. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. The animals are divided into three classes, namely, (1) bovine, comprising oxen and buffaloes, (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys, and camels. The total number of live-stock of each of these three

Table V
Livestock, ploughs
and carts

	Number in thousands				
	Bovine	Ovine	Others	Ploughs	Carts
Ajmer-Merwara . . .	446	570	13	48	17
Assam	5,661	744	23	1,167	77
Bengal	25,287	6,049	116	4,592	860
Bihar and Orissa . .	21,308	6,779	227	3,542	625
Bombay	11,796	6,421	571	1,583	734
Burma	6,234	362	69	844	722
Central Provinces and Berar	12,652	1,739	154	1,654	1,083
Coorg	139	3	1	29	1
Delhi	127	38	10	17	8
Madras	22,441	20,270	172	4,476	1,235
North-West Frontier Province	1,081	921	189	215	6
Punjab	14,294	8,075	1,327	2,324	339
United Provinces . .	31,459	8,791	764	5,053	998
Total	152,925	60,765	3,636	25,544	6,705

classes in each province, together with the numbers of ploughs and carts, is stated in the margin. Of the total number of live-stock of the bovine class (153 millions), which is cattle proper, the United Provinces accounted for 21 per cent, Bengal 16, Madras 15, Bihar and Orissa 14, the Punjab 9, the Central Provinces and Berar and Bombay 8 each, and the remaining provinces 9 per cent. In the case of stock of the ovine class (sheep and goats), however,

Madras accounted for 33 per cent of the total, followed by the United Provinces (15 per cent), the Punjab (13 per cent), Bihar and Orissa and Bombay (11 per cent each) and Bengal (10 per cent). The table below shows the number of live-stock of the bovine class (cattle proper) per 100 acres of sown area and per 100 of the population in each province:—

Number of cattle			Number of cattle		
	Per 100 acres of sown area	Per 100 of population		Per 100 acres of sown area	Per 100 of population
Ajmer-Merwara	128	80	Coorg	101	85
Assam	94	66	Delhi	60	20
Bengal	105	52	Madras	66	49
Bihar and Orissa . . .	86	57	North-West Frontier Province	47	44
Bombay	36	58	Punjab	50	61
Burma	34	42	United Provinces . . .	87	65
Central Provinces and Berar	51	81			

It will be seen that the number of cattle per 100 acres of sown area ranges between 34 in Burma and 128 in Ajmer-Merwara, while the number per 100 of population varies from 20 in Delhi to 85 in Coorg. The average for British India, as a whole, is 66 per 100 acres of sown area and 57 per 100 of the population.

The varieties of land tenure in the different provinces are included in Table VI and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; and when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants, of smaller holdings, the tenure is known as *raiyyatwari*. Under either system there may be rent-paying sub-tenants. Zamindari tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a limited number of years only. Village

Table VI
Land Revenue
Assessment

* In Burma, and the Central Provinces and Berar, the census is taken annually; in all other provinces it is taken quinquennially.

communities and *raiyatwari* tenures are, as a rule, temporarily settled, and the land revenue assessed on them is liable to change from time to time.

The following table shows the position as regards the forms of land tenure, in the surveyed areas of the various provinces, according to the latest statistics available, the figures roughly indicating the extent to which the different systems prevail :—

systems prevail :—

	Raiyatwari	Zamindari (individual proprietors or village communities) settled		Total
		Permanently	Temporarily	
	Acres (1,000)	Acres (1,000)	Acres (1,000)	Acres (1,000)
Ajmer-Merwara	974	797	1,771
Assam	29,837	3,926	1,722	35,485
Bengal	39,277	9,978	49,255
Bihar and Orissa	41,840	11,333	53,173
Bombay	74,769	...	3,971	78,740
Burma	155,849	155,849
Central Provinces and Berar	11,184	...	40,453	64,088*
Coorg	1,020	1,020
Delhi	369	369
Madras	62,176	28,843	...	91,019
North-West Frontier Province	8,446	8,446
Punjab	60,172	60,172
United Provinces	6,724	61,002	67,924†
Total	334,535	121,584	198,243	667,821‡

It will thus be seen that 51 per cent of the total area (excluding Government forests in the Central Provinces and Berar) is held by *raiyatwari* proprietors, while 19 per cent is held by permanently settled and 30 per cent by temporarily settled *zamindari* proprietors.

The statistics for this table are collected annually in Burma, Assam, Ajmer-Merwara, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar and Orissa, the United Provinces, Bombay, Madras and Coorg. According to the latest statistics available, the total revenue from land

	Total revenue from land (R1,000)	Total population (1,000)	Revenue per head R a.
Ajmer-Merwara	3.65	408	— 15
Assam	1,33.81	8,622	1 9
Bengal	3,11.38	48,917	— 10
Bihar and Orissa	1,66.91	36,669	— 7
Bombay	4,83.11	20,607	2 5
Burma	4,69.98§	14,667	3 10§
Central Provinces and Berar	2,31.27	16,508	1 8
Coorg	4.15	164	2 9
Delhi	5.69	636	— 14
Madras	7,71.33	46,730	1 10
North-West Frontier Province	27.52	2,497	1 2
Punjab	6,13.03	23,551	2 3
United Provinces	7,03.84	46,715	1 8
Total	38,28.73	265,691	1 7

(excluding cesses) for the whole of British India amounts to about R 38 crores. This represents the actual realisable demand¶ on account of the year, no account being taken either of the collection of arrears for past years, or of amounts remaining uncollected at the end of the year. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province.** For additional details, reference should be made to Table No. 69 on pages 260-267.

Table VII shows prices of staple crops at harvest-time. The provincial figures represent median averages of the district figures reported in the provincial Season and Crop Reports.

Table VII
Harvest prices

* Including 12,451,000 acres of Government forests.

† Including 208,000 acres of forest area.

‡ Including 12,451,000 acres of Government forests in the Central Provinces and Berar and 208,000 acres of forest area in the United Provinces.

** Statistics of the incidence of land revenue assessment dealt with in this table show only the average amount contributed by each acre of land or per head of population in each province or district towards land revenue. They cannot be used for comparing the burden of land-revenue on land in the different districts and provinces as no valid comparison is possible without taking into account such factors as the nature of the soil, climate, facilities for irrigation, etc.

§ Surplus revenue on account of uncultivated lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of such losses.

¶ Excluding revenue of certain districts for which figures are not available.

The Agricultural Department or the Land Records Department in each province maintains a statement of the average yield per acre of land of average quality, irrigated and unirrigated, of crops in each district. In order to test the accuracy of the standards of normal or average yield, and, if necessary, to revise them, a system of crop-cutting experiments exists in almost all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the provincial Agricultural Department or provincial Land Records Department. The results of the experiments are reported to the head of the provincial Agricultural Department, or Land Records Department, who revises the standards in the light of these returns, local enquiries and personal knowledge. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table in Appendix A shows the figures as last revised with reference to the crop-cutting experiments and enquiries made up to 1931-32.

Appendix A
Average yield of
crops

Appendices B and C require little or no comment. Appendix B explains the vernacular terms used in this volume, and Appendix C, the classification in Table IV of the various crops cultivated in India.

Appendix B
Vernacular terms
Appendix C
Classification of crops

The map, charts, and diagrams exhibited in the volume illustrate—

- (1) the departure of sown area and that of rainfall in 1933-34 from the average of the preceding ten years ;
 - (2) variations in rainfall as compared with the normal in relation to the total area sown, food crops area, and current fallows (reversed) ;
 - (3) total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow, and current fallows ;
 - (4) total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops ;
 - (5) area under rice, wheat, millets, oilseeds, cotton, jute, and other crops ;
 - (6) total area sown and area under different crops ;
 - (7) total live-stock divided between bovine, ovine, and others ;
 - (8) shares of provinces in the total area under principal crops
- and (9) harvest prices of certain principal crops.

Charts

P. M. JOSEPH,

*Offg. Deputy Director (Statistics),
for Director-General.*

Calcutta, December 10, 1935.

2. Total area sown, area under food crops, current fallows (reversed) and variations in rainfall as compared with normal.

NOTE.—(1) In the above chart figures of area represent million acres, while those for rainfall inches.
 (2) The curves relating to "Current fallows" and "Rainfall" should be read with reference to scales shown on the left hand side.

3. Total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow and current fallows.

NOTE.—(1) "Total cultivable area" represents the sum of net area sown, culturable waste, and current fallows.
 (2) "Uncultivable area" includes the area under forest.

4. Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops.

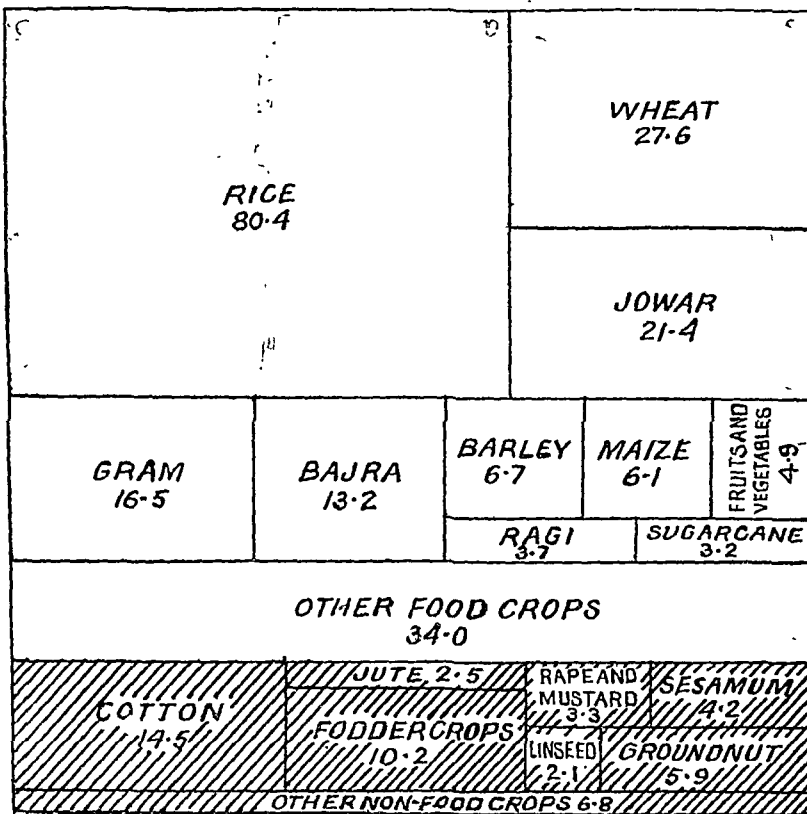

5. Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops.

NOTE.—Millets represent jowar, bajra, and ragi.

6. Total area sown in 1933-34.

Total area sown	267.2 million acres
Area under food crops (unshaded)	217.7 " "
Area under non-food crops (shaded)	49.5 " "

NOTE.—“Other food crops” are minor food grains, condiments and spices and miscellaneous food crops.

“Other non-food crops” are oilseeds other than sesamum, linseed, rape and mustard and groundnut; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

7. Total Livestock divided between bovine, ovine and others in 1933-34 as compared with the year 1924-25.

1924-25

MILLIONS

1933-34

MILLIONS

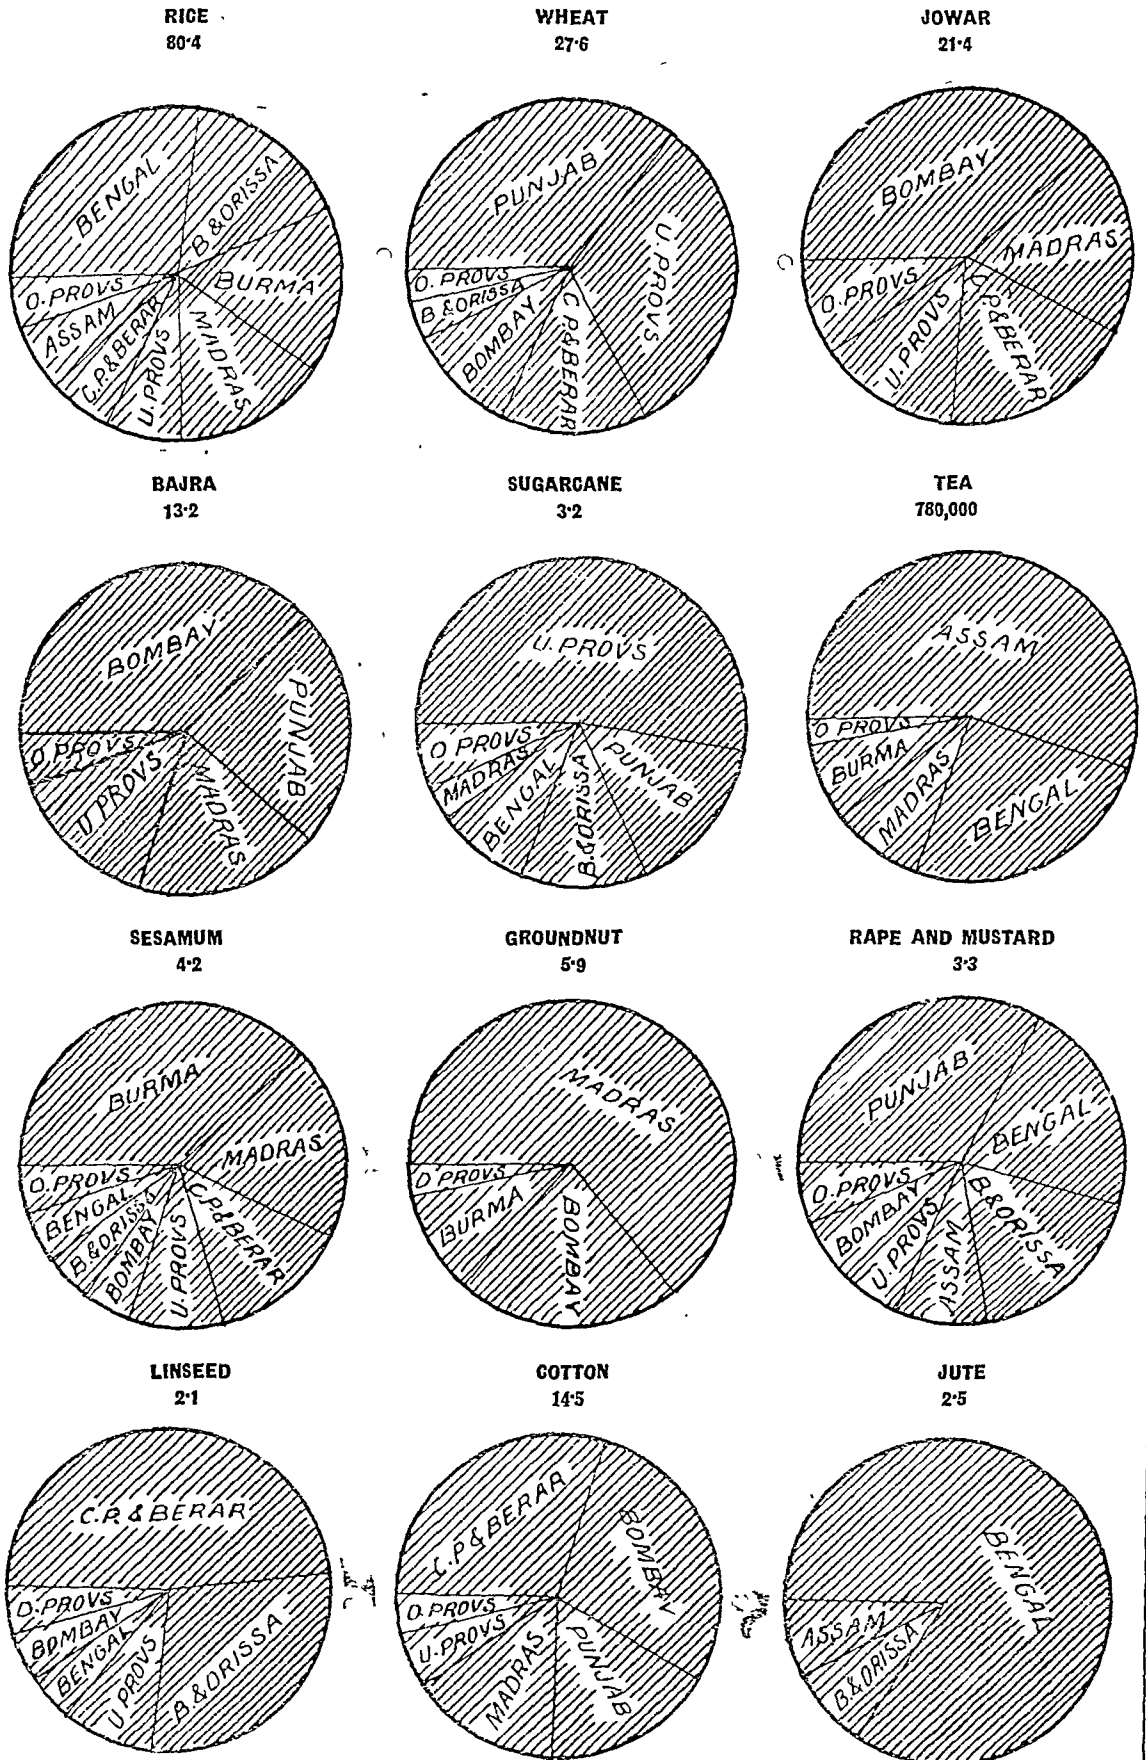

NOTE.—“Bovine” includes bulls and bullocks, buffaloes, calves and buffalo calves.

“Ovine” includes sheep and goats.

“Others” includes horses and ponies, mules, donkeys, and camels.

8. Shares of provinces in the total area (in acres) under principal crops in 1933-34.

NOTE.—In this diagram, the circles for the different crops have no relation to each other; they simply show the relative importance of each province in respect of each crop.

9. Harvest Prices (Rs. per maund) of Certain Principal Crops in India.

* Relates to rice—unhusked (Paddy).

Tables.

Summary Tables of the Agricultural Statistics of British India

No. 1—GENERAL SUMMARY, 1914-15 TO 1933-34.

Classification of area

[Thousand acres]

	1914-15	1915-16	1916-17	1917-18	1918-19	1919-20	1920-21	1921-22	1922-23	1923-24

* Includes 333,000 acres for which details are not available.

(g) Condiments and spices, fruits and vegetables, and miscellaneous food crops.

(h) The total of food crops and non-food crops shown here up to the year 1929-30 does not agree with the total sown area as the latter area includes certain areas in the United Provinces for which details are not available.

(i) Figures for years prior to 1920-21 are included under "fruits and vegetables."

(j) Figures for years prior to 1920-21 are included under "other oilseeds."

(k) Cinchona, Indian hemp, other dyes and tanning materials, other drugs and narcotics, and miscellaneous non-food crops.

* Miscellaneous revenue.

† Excluding certain districts for which figures for revenue are not available.

(a) Figure not available.

(b) Defective owing to incomplete data.

** See foot-note ** on page VIII of the Introductory Note.

§ See foot-note § on page 304.

due by the zamindars to Government, not those due by raiyats to the zamindars. The actual realisable demand on account of the year whether crops, etc., are excluded in the case of those provinces where all remissions are granted within the year to which the return relates, but in includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue, comprising fixed collections, estates, kyan tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of survey and settlement charge (Bengal); (5) rents, etc., of fisheries; (6) receipts for the improvement of Government estates; (7) 12 per cent from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, buccoba tax Madras Act, II of 1864, capitation tax (Burma), petroleum well revenue, jade and amber revenue, Thathameda tax (Burma), receipts from ruby land, and rents of buildings situated on such lands.

Column 8.—As in column 5, but only ordinary land revenue on fully assessed areas is entered

Note.—The figures for foreign countries have been taken from the monthly bulletins of International Crop Report and Agricultural Statistics published by the International Institute of Agriculture, Rome.

(a) Includes meslin and spelt. (b) Not yet available. (c) Including sorghum.

* Including figures for Indian States, namely, 5,683,000 acres for rice, 9,316,000 acres for wheat, 931,000 acres for barley, 2,140,000 acres for maize, 9,628,000 acres for cotton, and 787,000 acres for linseed. The figures for rice, barley, maize and linseed for Indian States are, however, not complete, as returns for those crops are not furnished by a number of States.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in the Southern Presidencies. The provincial areas in this column exclude Indian States in direct political relations with the Government of India, but include States politically controlled by Local Governments, with the exception of the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of Indian States included in column 2.

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II, III and IV were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Column 5 or 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 6; for instance, the village returns sometimes do not include the forest areas. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in blocks, the area by village papers represents the actual total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railways, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of Table II.

* This figure is that of settlement as there is no record of area according to professional survey.

† Excludes area of Indian States which are now in direct political relationship with the Government of India.

See explanations given in footnotes (page 14).

* Statistics for Manpur Pargana are excluded from the table from 1931-32 as the territory forms part of the Indore State.

† Excludes area of Indian States which are now in direct political relationship with the Government of India.

(a) There is no record of area according to professional survey. These figures are those of settlement. The area stated is that of the whole pargana excluding Jagir and Inam villages as given in the settlement records.

Column 2 states the area as returned by the provincial Revenue Survey and Settlement Department. In Sind, the revenue survey being incomplete the exact area is not known: the column states the area of surveyed tracts plus the estimated area of unsurveyed tracts.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (78,878,307 acres entered in columns 5 and 6 for 1933-34 (page 22), 72,983,621 acres are based on actual returns and 5,894,686 acres on estimates.

Column 2 states the area as ascertained by the provincial Survey Department, supplemented, for tracts which have not come under the operations of that Department, by areas obtained with the computing scale from the Survey of India Atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain *raiyatwari* and whole *inam* villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts and the absence of a detailed survey. Of the total area (91,007,561 acres) entered in col. 6 for 1933-34 (page 30), 80,872,749 acres are based on actual returns and 10,134,812 acres on estimates.

NOTE—The variations in the areas shown in different years under the same item in the same province do not necessarily represent an actual increase or decrease on the area in question. In many cases, a revised classification or the correction of a faulty estimate is responsible for the change.

Column 2—"Forests" mean "any land classed or administered as forests" under any legal enactment dealing with forest. Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the Forest Administration Reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, local boards, municipalities, etc., and (3) because, on the other hand, certain village and other lands not covered by forest but worked and returned as forests by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the sown area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

See explanations given in the footnotes (page 37).

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the Forest Administration Report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

(b) Includes unculturable Government waste and unculturable lands.

(c) States the estimated area of culturable Government waste.

(d) Shows (1) the estimated area of culturable lands, and (2) the difference between the net area sown and the gross area of the actual holdings (exclusive of lands). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

* Statistics for Manpur Pargana are excluded from the table from 1931-32 as the territory forms part of the Indore State.

Column 2—The figures represent reserved forests, but exclude the areas of forest villages within the reserves which are entered under the appropriate heads of this table.

Columns 3 and 4—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good.

Column 5 includes generally all lands which are thrown out of cultivation or not cultivated for three years. Figures for the hill districts (except the plains portion of the Garo Hills) and Sadiya and Balipara Frontier Tracts are rough estimates.

Column 6—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts and the Sadiya and Balipara Frontier Tracts are based on estimates.

(a) The figures relate to the plains portion only.

Table II—continued

No. 24—CLASSIFICATION OF THE AREA (IN ACRES) OF EACH DISTRICT IN BENGAL

DISTRICT		Forests	Not available for cultivation	Culturable waste other than fallow	Current fallows	Net area sown	Total

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2, so far as Bombay proper is concerned, includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions. The figures in Sind also do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.

Column 3 includes all land recorded at the survey and settlement as unculturable, although at times a very small quantity of this land is cultivated.

Column 5—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

1933-34	295,414	85,447	231,255	33,424	569,403	1,214,948

NOTE—For tracts outside the surveyed area the figures are based on estimates.

Column 2—The area classed as forests comprises only those areas which are administered by the Forest Department as reserved forests or fuel reserves.*Column 3*—Land not available for cultivation includes all land absolutely barren and all lands covered by buildings, roads, water or otherwise appropriated to uses other than agriculture. In settled tracts the unculturable area is taken from settlement registers, but in the unsettled tracts it is obtained from the best source available.*Column 4* includes land thrown out of cultivation and abandoned and any land under palms and bamboos and thatching grass which is not shown in columns 2, 3, 5 or 6.*Column 5* includes all land occupied for agricultural purposes which is left uncultivated. In Lower Burma (excluding the Thayetmyo district) such lands are assessed in most cases at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.

1933-34	423,838	229,420	1,063,673	134,415	1,076,816	2,928,171

Column 2 shows the area administered by the Forest Department, plus the areas in the Chhattisgarh and Chanda zamindaris which are outside the boundaries of surveyed villages. These latter areas are almost wholly under high forest and include only a negligible proportion of sparse and shifting cultivation. In Berar, the forest area includes that administered by the Forest Department but excludes a large area of cultivated land in the Melghat taluk in Amraoti district shown as forest in the forest report.

Column 3 states areas covered with water, hill or rock and land occupied by buildings and roads. For Berar, it includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub, jungle or grass, and (4) groves not included in holdings. For Berar, it includes land available for cultivation but not given out.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow. For Berar, it includes occupied culturable land left fallow for private reasons such as grazing, rotation, etc.

Column 2 includes the area cultivated within forests. The area cultivated with coffee, tea, and rubber within forests is, however, excluded from this column and is shown under column 6.
Column 4 includes areas occupied by *labul* and casuarina trees when they do not form parts of forest areas.
Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Peshawar classification is amended according to area of each class of soil actually cultivated each year.

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 3,836,960 acres of mountain tracts in Kangra (mostly forest areas). These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years but, as a change in classification is not generally made until the year for quinquennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7) is thus due to the inclusion in column 19 of the area irrigated at both harvests.

Column 4.—The term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by enclosing depressions or throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

(a) Statistics of irrigation are not collected.

Note.—(i) This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each and the areas so estimated are separately returned. The estimate is made by the village crop-plant, or is subsequently determined on formulae prescribed by the provincial authorities.

(ii) The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

(iii) Column 10 (other food-grains, including pulses).—Arhar (pigeon pea), barabati, lobia or chowli (asparagus), mung (green gram), kulthi (horse gram), urad (black gram), field gram, cheik (job's tear), lentils, cheena (common millet), kangni (Italian millet), kodo or varagu, kutki (little millet), kochu, rice, pizen or little grass, swank or shama, chickling vetch, buck wheat, wadalu or barti, beans (sutri or ghurash, French or British, voh, moth, lima, and soy).

(iv) Included under 'Other food grains, including pulses'.

Column 30 (other dyes and tanning materials).—Arnatto, chayroot, divi-divi, henna, madder, morinda, safflower, saffron.

Column 33.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on Indian Tea Statistics published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 37 (other drugs and narcotics).—Alces, arica nut, ajwan or Bishop's weed, sweet basil, betel-vine, country borage, bogoda binjal or nala mukha, dhatura, purple flax-bane, isafgul, kolinja or vampa, senna, sweet flag.

NOTE.—The areas of crops except cotton and tea are collected by the Land Records staff for the temporarily settled plains revised quinquennially by the district officers except in case of forest crops for which estimates have to be made annually. In the crops except cotton and tea the areas are estimated in Sylhet by the Deputy Commissioner on the basis of the population figures available in all districts are supplied by the tea-garden managers and proprietors. The areas of cotton are obtained in Cachar from the *dalais* and *sidars*, and in the Naga and Lushai Hills from intelligent chiefs.

* Included under 'Other food grains, including pulses.'

(a) The Increase is due generally to favourable weather at sowing time.

districts and plains portion of Garo Hills, and those for the Hills and the Sadiya and Balipara Frontier Tracts are based on estimates permanently settled tracts of Sylhet and Goalpara the areas of jute are reported by the village *chaukidari panchayats*. For other and the surveyed areas of the temporarily settled parts of the district and in Goalpara they are obtained from zamindars. Tea from *patuaries* for the plains subdivisions and for the North Cachar Hills an estimate is made by the subdivisional officer; in supervisor kanungo of hill sub-circle, in Sibsaagar and Goalpara from *mardals* or other village officers, in Khasi and Jaintia Hill.

NOTE.—The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crops by the village accountants. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jowar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, are distributed in accordance with prescribed formulae and entered under the crops of which they are composed.

Columns 3, 4, 5, 6, 9 and 10.—The whole of the area of the land planted with food-grains, wheat, barley, etc., mixed with oil-seeds, is shown under food-grains in this table. The area shown under food-grains which was really planted with oil-seeds (as a mixed crop) is roughly estimated to have been 4,032,000 acres, in the whole of the United Provinces in 1933-34.

(a) There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal. Estimates have, however, been made for them and included in the table.

Columns 12, 13 and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, oilseeds are thinly sown in combination with wheat, barley, gram and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1933-34 for the whole of the United Provinces to 593,000 acres of linseed, 902,000 acres of sesamum, and 2,594,000 acres of rapeseed.

See explanation given in the footnote (page 108).

(a) In Coorg a census is taken every five years. The last census was taken in January 1930 by the circle *shambhogs* and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899. Animals in municipal towns are included.

† Excludes figures for Manpur Pargana which forms part of the Indore State.

Note.—(i) The statistics for 1929-30 are based on a cattle census held in 1930.

(ii) No information is available for the Khasi and Jaintia Hills, Naga Hills, Lushai Hills, and the hill portions of the Garo Hills district.

(a) Figures refer to census held in 1920.

(b) Includes figures for 1920 for Kamrup and Sibsaagar districts where the census was not taken in 1924-25.

Note—The last quinquennial live-stock census was held in January 1930 and the figures for 1929-30 are based on the results of this census. As on the previous occasions complete census was carried out in all the districts of Bihar and Orissa and was extended this time to Palamu, Manbhum and Singhbhum. In Hazaribagh and Ranchi, however, for want of a suitable enumerating agency a fractional census was again adopted and this time it was taken in 250 villages (instead of 49 villages of 1925) of the four representative localities of the districts and the previous figures were revised in the light of the results of the fractional census.

NOTE.—(i) Annual returns of agricultural stock are prepared by village headmen, revenue surveyors and *taikthugyis*, the enumeration taking place from end of February to middle of March in each year. The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

(ii) No information is available for the Federated Shan States, Putao, Karenni and the Chin Hills.

Note.—In the Central Provinces the figures are collected annually, between the 15th November and the 15th March, by the village *patwaris* for the areas in their respective charges. The figures for each village are sent to the *tahsil* and the numbers of plough cattle are entered by the *kanungo* in a village register. The *patwari* takes into account all animals including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stocks in cities, large towns, cantonments, and in forest villages are included being enumerated by special arrangement.

In Berar, a census is made annually by the village officers. All cattle belonging to one owner are entered against his name even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

NOTE.—The last quinquennial census was taken in January 1930 throughout the Presidency. The census was taken in all villages, Government, *Isam*, and Zamindari. Stock in cities, cantonments, and that employed in Government departments and municipalities were included. Oxen, buffaloes, horses and ponies not old enough for work or breeding were treated as young stock.

Note.—The varieties of tenure are included, as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province. Areas under Government forests in the Central Provinces and Berar, and the forest area of one district in the United Provinces, are, however, shown separately.

Column 3.—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 6). In Madras, Bombay and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) is classed for the purposes of this column as "area not fully assessed". Area should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops or for other special reasons.

Column 4.—This head is sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net sown area as shown in column 6 of Table II.

(3) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

* Details not available.

† Incomplete.

							8 1,36,029	1933-34

Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payable by ryots to the zamindars. The actual realisable demand on account of the year is entered in the "Land Revenue" in the Civil Accounts. The heads are:—

(1) Land revenue (including nazaranas), over-collections (Hombi)

(2) Land revenue (including nazaranas), over-collections (Hombi)

(3) Land revenue (including nazaranas), over-collections (Hombi)

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payments due by the zamindars to Government, and not those due by raiyats to the zamindars. The actual realisable demand on account of the year is entered after excluding arrears for past years. This column includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue comprising fixed collections, revenue from canals in Sind, fluctuating collections (including nazaranas), over-collections (Bombay), surplus collections, collections from Government estates, kyun tax (Burmah); (2) sale of Government estates; (3) sale-proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement cases; (5) moturpha (house tax) collections; (6) assessment of alienated lands less quit rent; (7) recoveries on account of survey and settlement charges (Bengal); (8) rents, etc., of fisheries; (9) receipts for the improvement of Government estates; (10) 12 per cent on collections from Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, husaba tax (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of Revenue Courts (except in Bengal and Assam), receipts under Madras Act II of 1861, capitation tax (Burmah), Petroleum well revenue, sale and amber revenue, tharhameda tax (Burmah), receipts from ruby mines (Burmah), recoveries in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class G land and rents of buildings situated on such lands.

Column 6.—The population is generally that of the last census.

Column 8.—As in column 5, but only ordinary land revenue on fully assessed areas is entered.

Column 9.—To be, column 8 divided by column 4 (a).

Column 10.—To be, column 8 divided by column 4 (b).

Column 11.—To be, column 8 divided by column 4 (c). They cannot be used for comparing the burden of land revenue of land or per head of population in each province or district towards land revenue. They cannot be used for comparing the nature of the soil, climate, facilities for irrigation, etc.

Note.—The table is prepared annually.

Column 1.—The *khalsa* area has been classed as "Zamindari and village communities (temporarily settled)" and the *jagir* and *istamdar* areas as "Zamindari (permanently settled)".

Column 4 includes in the case of the *khalsa* villages the assessed cultivated area including assessed fallows.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area (col. 4a)	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessed per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Column 1—Raiyatwari includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under amindari (temporarily settled). Zamindari (temporarily settled) includes, besides temporarily settled zamindari estates, fee simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 0.129 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

* Incomplete.

	Miscellaneous revenue	27,020		

The table is prepared quinquennially and the figures were last collected in 1932-33.

Column 1.—The following classification of estates has been adopted:—

- (1) Zamindari (permanently settled) including estates managed for proprietors by Government.
- (2) Zamindari (temporarily settled) comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

	Zamindari (temporarily settled)	20,795	7,939	...	12,856	12,856	21,798		
	Miscellaneous revenue	4,308		

The table is prepared quinquennially, and the figures were last collected in 1931-32.
Column 1.—The following classification of estates has been adopted:—

- (1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.
 - (2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods and (b) all estates owned by Government as proprietor.
- Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years, about 0.24 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Nawabshah	"	2,494,018	1,950,878	...	543,140	518,635	16,81,855	496,612

The table is prepared quinquennially, and the figures were last collected in 1930-31.

COLUMN 1.—Lands held under special tenures, such as *talukdari*, *mehwasi*, *udhad-jamabandi*, *narvadari*, and *bhogdari* in Gujarat and *khoti* and *is-fai* in the Konkan, are classed as "Zamindari and village communities (temporarily settled)".

COLUMN 3.—(a) Includes alienated area and the area held free of revenue or the revenue which has been reduced by special agreement, and also the fully assessed unoccupied area. For Sind, it includes fallows and fully assessed unoccupied area.

COLUMN 3.—(b) Includes alienated cultivated and zamindari cultivated (estimated) land.

COLUMN 4.—Includes land under temporary cultivation, also *pot inams* paying full assessment. For Sind it excludes fallows and fully assessed unoccupied area.

COLUMN 5.—States ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years about 3·6 per cent of the total revenue entered in this column for the Bombay Presidency was remitted on account of assessed unoccupied lands, short crops, etc.; in Sind 24 per cent of the total revenue entered in this column was remitted on account of assessed unoccupied lands, short crops, etc.

COLUMN 10.—The incidence is calculated from the occupied area, which in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area. In Sind the incidence is calculated from the cultivated area (excluding fallows) and the assessment on that area.

COLUMN 11.—Includes population of *poti* areas and the like scattered areas, for the Bombay Presidency, which cannot be distinguished from the population of the fully assessed area.

* See footnote ‡ on page 261.

Column 2 includes tracts outside the surveyed area for which the figures are mostly based on estimates.

Column 3(a).—No deduction is made for areas held revenue-free or at privileged rates as they are ordinarily less than an entire village and as it is difficult to estimate the corresponding deductions to be made in the population (col. 11).

Column 3(b) includes the whole area except that occupied for cultivation.

Column 4(a) includes the area occupied for cultivation including land wholly or partly exempted or remitted from assessment on account of fallow or short crops.

Column 4(b) represents the area actually sown whether assessed or exempted or remitted from assessment.

Column 5 comprises ordinary land revenue (including water rate), capitation tax, *thathameda* tax, fishery revenue and miscellaneous revenue (petroleum, rubies, other minerals, etc.). Sums remitted on account of uncultivated land or short crops, etc., are excluded.

Column 6 represents the population at the last census held in 1931.

Column 2.—Zamindari (temporarily settled) includes *malguzari* and *thekadari*.

Column 3(a).—Zamindari estates properly so-called (that is, excluding *malguzari*) are classed as not fully assessed in the Central Provinces.

In Berar this column states *jagir, iqara* and *palampat* villages, all unassessed lands, forest areas, village sites, roads, rivers, etc.

Column 3(b).—In Berar *pet khorab* lands are excluded from this column, which includes only occupied lands available for cultivation.

Column 4(b) excludes fallows in the Central Provinces. In Berar, it states the cultivated area in *Patela* villages only.

Column 8 for Berar shows assessment on occupied lands only, as stated in the explanation for column 4(a).

Column 10.—The cultivated area included for the Central Provinces in this column is the fully assessed portion of the net sown area. In Berar, the incidence is calculated on the area entered in column 4(b), that is, the cultivated area in *chitra* villages only.

Column 11 excludes population of *jagir* and *isara* villages of Berar.

* See footnote † on page 261.

The table is prepared quinquennially. The figures were last collected in 1933-34.

Column 3 (a).—In the case of raiyatwari tracts this column states the areas of unoccupied assessed lands, of all unassessed *poramboles*, of minor *india* lands in Government villages held free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous"; and in the case of zamindari tracts the areas of hills, *poramboles*, and minor *india* lands are entered. The entire area of whole *india* villages is deducted in this column.

Column 3 (b).—Raiyatwari includes the area of certain Agency tracts in Ganjam, Vizagapatam and Godavari, and also the difference between the area by professional survey and the area according to village papers.

Column 4 (a).—The figures for the raiyatwari tenures in this column represent the total occupied area stated in village papers which differ in some cases from the resultant of preceding columns.

Column 4 (b).—The areas shown in this column represent the actual areas cultivated except in the case of Ganjam, Vizagapatam and East Godavari districts where actuals are supplemented by estimates.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Total revenue from land per head of population (cols. 6 and 6)	Land revenue assessed on fully assessed area (col. 4(a))	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA* (COL. 1)		Population of fully assessed area	Land revenue per head of population of fully assessed area (c. l. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Column 8 shows only the "ordinary revenues", as defined in the Civil Accounts, on area fully assessed.

Column 10—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4 (a).

Column 11 states the entire population of raiyatwari and zamindari villages, respectively.

* See footnote † on page 261.

The table is prepared quinquennially, and the figures were last collected in 1931-32.

Columns 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming.

Column 5 states (1) "ordinary revenue," comprising (a) fixed collections (including land revenue on account of resumed *Gorail Jagirs*), (b) fluctuating collection, (c) surplus collections, (d) collections from Government estates (including collections from Dudhi, Tarai, and Bhabar estates, and receipts from forest estates); (2) sale of Government estates; (3) sale-proceeds of waste lands and redemption of land tax; (4) miscellaneous, comprising (a) receipt from quarries and mineral products in forest and land not under the management of the Forest Department, (b) water mills rent, (c) *malikinis* or allowance to excluded proprietors, (d) fines and forfeitures of revenue courts, (e) recoveries in India of law charges in England on account of appeals from India, (f) miscellaneous receipts, namely, (i) *patwari* miscellaneous receipts (revenue record room) (ii) mutation fees, (iii) mutation fines, (iv) sale of waste paper, and (v) partition fees, (g) rents of railway class "C" land and rents of buildings situated on such land. On the average of the last five years about 41 per cent of the total revenue entered in this column was remitted or account of unoccupied lands, short crops, etc.

* No information.

1 13 7	19,21,005	1 12 7	2 13 11	1,014,336	1 13 5	2	26,180	Zamindari and village communities (temporarily settled)	Bara Bansi
— 10 1	11,985	— 1 11	— 11 7	19,023	— 10 1	Zamindari (permanently settled)	
1 6 10	15,10,323	1 8 8	1 15 11	*	*	2	142,591	Zamindari and village communities (temporarily settled)	Bareilly

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

Columns 13 and 14.—The figures are taken from the Census Reports of 1931.

* No information.

** See footnote † on page 231.

APPENDICES

APPENDIX A

The Average Yield per Acre of Principal Crops in India.

A provisional estimate of the yield per acre of principal crops cultivated in India was first made in the year 1892; this estimate was based on the then available materials, namely, the various statistical publications, such as the periodical agricultural and settlement reports, crop forecasts, gazetteers, replies received in response to enquiries from the Famine Commission and other *ad hoc* bodies, etc. To provide for the periodical revision of the estimates, a system of experimental crop cuttings was first pre-scribed in 1893 by the Government of India. The results of these experiments are reported by Local Governments and Administrations at the close of each quinquennium and form principally the raw material for this volume. The returns for the last quinquennium ending 1931-32 have been scrutinised and tabulated in the appended tables.* These figures of outturns per acre are of some importance in view of the fact that they will form, during the present quinquennium (ending 1936-37), the basis for estimating the production of crops for which forecasts are prepared.

2. The estimate of standard yield should represent the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made up to the period under review. When, therefore, this average is multiplied by the average area sown, the result should give as near an approximation as possible to the outturn of the crop in an average year. The Departments of Agriculture or Land Records in the different provinces maintain standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for several crops in each district. The object of the experiments or investigations annually made is to test the accuracy of these estimates and to enable the head of the Department in each province to revise his provincial estimates, when necessary. Should it happen that the period has been one of exceptionally favourable or unfavourable conditions which have affected the experiments reported, this would not in itself necessarily involve a change in the standard estimates for the district or for the province, unless there are other reasons for believing that, as estimates of average yield in an average year, they have been pitched too high or too low.

3. On an examination of the relevant returns for the quinquennium ending 1911-12, it was felt that the results of the experiments as conducted by the district revenue staff were generally unreliable. A change in the system was therefore considered necessary; and in 1915 the Government of India, with a view to improve the returns, issued instructions to employ, as far as possible, expert officers of the Agricultural Department to carry out experiments for the investigation of the average crop outturns in each province. The new system was, however, introduced only in some provinces, and that only to a limited extent, due mainly to paucity of staff possessing the many necessary special qualifications. During the quinquennium under review no crop cutting experiments were conducted in Bombay and Madras. In Bihar and Orissa, the method of estimating standard outturns by the method of random sampling has been experimented upon and is reported to have proved successful; but the Local Government consider it still premature to use the figure thus obtained as a standard mean yield for the province. In the case of Bengal, the majority of experiments have been conducted by the trained officers of the Agricultural Department during the quinquennium under review, and the normal yields have been deduced solely from their results without taking into consideration the results of the past quinquennia. In certain other provinces, such as Sind, Ajmer-Merwara, Delhi, Coorg and the Mysore State, the standard yields appear to have been worked out on the actual results of experiments conducted during the quinquennium under review alone without considering whether the character of the seasons included in the period was such as would justify the results to be regarded as normal or standard.

4. As a result of the experiments conducted or investigations made during the present quinquennium, several revisions have been made in the figures of standard outturns previously adopted. Some of these variations are noted below.

* The return for the previous quinquennium ending 1925-27 was published in 1929.

APPENDIX A--continued

The yield of rice shows an increase in Coorg (from 1,464 to 1,580 lbs), the Punjab (from 1,178 to 1,212 lbs), and Bengal (the main or winter variety increasing from 1,022 to 1,111 lbs); the outturn of the crop in Sind has, on the other hand, been lowered from 1,364 to 1,255 lbs. The standard yield of wheat has been lowered in the United Provinces from 1,050 to 1,000 lbs, in the Central Provinces and Berar from 577 to 548 lbs and in the Punjab from 795 to 791 lbs; while it has been raised in the provinces of Delhi and Bengal from 828 and 721 lbs to 982 and 816 lbs, respectively. The yield of barley has been raised in Ajmer-Merwara from 1,160 to 1,315 lbs and in Delhi from 769 to 924 lbs, while there has been a marked decrease from 828 to 709 lbs in the North-West Frontier Province and from 805 to 722 lbs in the Punjab. The yield of jowar generally shows a lower trend except in Delhi where the yield has been slightly raised from 523 to 530 lbs. The yield of bajra has been lowered in the Punjab from 419 to 414 lbs. In the case of maize, the yield shows an increase in Delhi from 716 to 849 lbs and in the Punjab from 916 to 951 lbs, while it has been lowered in the North-West Frontier Province from 1,124 to 1,023 lbs and in the United Provinces from 1,100 to 1,050 lbs. The yield of gram is reduced from 616 to 585 lbs in the Punjab and from 800 to 750 lbs in the United Provinces but it has been increased in Bengal from 811 to 935 lbs. As regards oilseeds, the yield of linseed has been slightly increased in the Central Provinces and Berar from 212 to 215 lbs. In the case of sugarcane, the average yield in Bengal, Assam and the United Provinces increased from 3,054, 2,576 and 2,600 lbs to 4,643, 2,688 and 2,700 lbs, respectively; while in Sind, the North-West Frontier Province and the Punjab there was a decrease from 7,600, 2,761 and 1,953 lbs to 7,200, 2,477 and 1,951 lbs, respectively. In the case of cotton there seems to be an all-round increase except in the Punjab. The largest increases occur in Sind where the yield is placed at 215 lbs against 181 lbs and in the comparatively unimportant tracts of Delhi, Assam and the North-West Frontier Province. In Bengal and Bihar and Orissa, the average yields of jute have been increased from 1,331 lbs and 1,200 lbs to 1,465 lbs and 1,333 lbs, respectively.

5. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special annual returns of the crop for the five calendar years ending 1931.

APPENDIX A—continued

6. The leading features of the provincial reports are summarised below :—

Ajmer-Merwara.—Experiments were conducted by the three Sub-divisional officers and the Tahsildar in Todgarh Tahsil in respect of the following main crops : jowar, maize, cotton, barley and wheat. On the basis of the results of these experiments, the yield of barley has been increased from 1,160 to 1,315 lbs ; while that of maize and jowar has been lowered from 1,040 and 340 lbs to 563 and 265 lbs, respectively. The experiments in cotton were confined to irrigated variety alone during the quinquennium under review and the yield of this variety has been lowered from 269 to 232 lbs. It appears that the provincial figures reported are merely the arithmetic averages of the district figures.

Assam.—Experiments were made during the quinquennium by the revenue officers on all crops for which forecasts are prepared and on certain other crops such as *matikalai* (*Phaseolus radiatus*), maize, potato and tobacco. The number of experiments made during the period under review was considerably less for practically all the important crops, the total number of experiments for all crops being 1,000 against 1,450 in the preceding quinquennium. Besides the experiments made by the Revenue Officers, systematic experiments were also conducted on sugarcane by the staff of the Agricultural Department during the first three years of the period. Only a few revisions have been made in the standards adopted for the province, and these are all in the upward direction except in the case of rape and mustard, the standard for which has been lowered. The important changes made are an increase in the yield of sugarcane from 2,576 to 2,688 lbs, and in that of cotton from 176 to 188 lbs ; while there has been a decrease in the yield of rape and mustard from 504 to 459 lbs. The standard yield of tobacco has for the first time been fixed at 840 lbs per acre on the basis of the experiments conducted during the present and past quinquennia.

Bengal.—The total number of experiments made during the quinquennium under review with staple crops (rice, wheat, gram, linseed, rape and mustard, sesamum, sugarcane, jute and tobacco) was 6,923, as against 6,697 in the preceding quinquennium. The largest number of experiments was carried out in respect of winter rice. Next in order of importance came autumn rice and jute, though in the latter case, the number of experiments was very much smaller than in the preceding quinquennium. As the majority of the experiments were conducted during the quinquennium under review by trained officers of the Agricultural Department with due care and accuracy, it is stated that greater reliance can be placed on the data on which the average yields have been based. Unlike the procedure followed in the past, the provincial averages have, on this occasion, been deduced solely from the results of the experiments conducted during the quinquennium under review without taking into consideration the results obtained during the preceding quinquennia. It is nevertheless claimed that the provincial averages now deduced may safely be taken as normal yields, although the question as to whether the particular years comprised in the quinquennium under review are sufficient to smooth out the peculiarities of the season does not appear to have been thoroughly tested. The results of the experiments made show that the average yields per acre of all the principal crops have appreciably increased ; and the position is explained as being due in certain cases to the spread of improved varieties and the methods of cultivation recommended by the Agricultural Department and their rapid adoption throughout the province. The important changes are in the yield of sugarcane from 3,054 to 4,643 lbs per acre, of tobacco from 1,007 to 1,191 lbs per acre, of jute from 1,331 to 1,465 lbs per acre and of autumn rice from 892 to 1,023 lbs per acre. The returns do not distinguish between irrigated and unirrigated crops, the area under the former being comparatively small in the province. A few experiments were also made as usual with certain minor crops, such as barley, maize, peas, lentil, potato, mung, arhar, khesari, and cotton.

Bihar and Orissa.—It was remarked in the preceding report that the method of crop-cutting experiments formerly adopted by district officers and the Agricultural Department had been given up in the province owing to admittedly unreliable results obtained therefrom and that the Local Government were experimenting with the statistical method of random sampling in arriving at the normal outturns of crops. The results of the experiments conducted under the new method during

APPENDIX A—continued

the last three years have demonstrated the value and practicability of the method as a guide to arriving at the standard outturn. But the Local Government consider it still premature to use the figures obtained under the new method. The standard yields in force have therefore been maintained. In the case of jute crop, however, the Director of Agriculture has revised the standard outturn of the crop on the basis of special enquiries made on the subject.

Bombay.—(i) *Presidency.*—It has long been recognised that the number of experiments conducted in the province during the past was not sufficiently numerous and representative to serve as reliable guides to the revision of normal yields. A scheme of conducting these tests on a more satisfactory basis by the agency of the Agricultural Department was, therefore, prepared by the local Director of Agriculture which was also approved by the Local Government. But unfortunately the introduction of the new scheme had to be postponed pending establishment of a satisfactory organisation for the purpose. No cropcutting experiments have accordingly been made in the province during the quinquennium under review, and the old standards continue. The Director of Agriculture has, however, revised after due consideration certain district standards of the unirrigated groundnut crop in the Deccan division.

(ii) *Sind.*—The standard yields based mainly on the actual results of the experiments conducted during the quinquennium under review show an increase in the yield of cotton from 181 to 215 lbs, and a decrease in the yield of rice from 1,361 to 1,255 lbs, of barley (irrigated) from 756 to 495 lbs and barley (unirrigated) from 963 to 397 lbs, of jowar (unirrigated) from 966 to 613 lbs and of sugarcane from 7,600 to 7,200 lbs. The appreciable decrease in the standard yields of rice, barley and jowar (unirrigated) is explained by the fact that owing to floods and unsteady supply of water these crops did not receive the normal stimulus and also suffered to some extent on account of invasion of locusts.

Burma.—As stated in the preceding report, standard yields in Burma are based on experiments made by Settlement Officers. The standards adopted for the quinquennium ending 1926-27 have generally been retained. But the standard yield of rice (cleaned) in the Myitkyina district has been slightly revised on consideration of a later settlement report.

Central Provinces and Berar.—The defects noticed in the preceding report with regard to the method of conducting crop experiments in the province still persist in some of the district reports. In addition, it has been found that proper allowance for dryage is seldom made in arriving at the result and sometimes no mention is made as to whether it has been allowed for or not. These defects are, it is stated, being brought to the notice of the district officers concerned by the provincial Director of Land Records and it is expected that more satisfactory data will be forthcoming in future. The method of random sampling was given a trial in the case of rice crop in Chattisgarh for the first three years of the quinquennium but it had to be abandoned for financial reasons. The method is, however, likely to be taken up again as soon as conditions improve; and if it proves successful, would be extended to other important crops. Of the five years included in the quinquennium under review, the first three were particularly unfavourable to *rabi* (spring) crops in the northern districts and Nerbudda Valley owing to prevalence of frost and rust in 1927, intense cold in 1928 and insufficiency of the late monsoon in 1929. During 1930-31 there was absence of timely winter showers which reduced the outturns of *rabi* crops, while in the closing year 1931-32 there was a partial failure of all *kharif* (autumn) crops, except rice, owing to excessive rainfall. The results of the experiments conducted in the unsatisfactory period covered by the quinquennium under review could not naturally be taken to provide a satisfactory basis for revision of the figures; and accordingly the revisions made in the present return have been reduced to a minimum. The present revision shows an increase in the yield of sugarcane (*gur*) from 3,186 to 3,300 lbs as a result of experiments made by the Agricultural Department for eight years and that of linseed from 212 to 215 lbs, while the yield of wheat has been lowered from 577 to 518 lbs and that of jowar from 656 to 616 lbs. In the case of cotton, the normal outturn of the crop for the province as a whole, on the basis of actuals ascertained by trade and mill statistics for the past ten years 1922-23 to 1931-32, works out at 108 lbs of lint per acre, as against the current standard of 102 lbs per acre. It is stated that

APPENDIX A—continued

though the Berar standards might require raising as a result of the introduction of improved seeds by Agricultural Department, yet the results of the quinquennium under review afford no reliable basis for such revision.

Coorg.—The only experiments made in Coorg have, as usual, been on rice. During the period under review 111 experiments were carried out and on the results of these experiments the average yield of rice has been raised from 1,464 to 1,580 lbs.

Delhi.—As compared with the preceding quinquennium, the important changes are an increase in the average yield of barley from 769 to 924 lbs, of wheat from 828 to 982 lbs, of maize from 716 to 849 lbs, of sugarcane from 2,296 to 2,386 lbs and of cotton from 165 to 185 lbs. The comparative increase in the yield of sugarcane is explained to be due to the damaging of the crop by floods and dust storms in the preceding quinquennium.

Madras.—It was explained in the preceding reports that the standard outturns adopted in Madras are not based on crop-cutting experiments alone, but on other data as well, such as the results obtained in Government farms, trade figures, etc. The utility of crop-cutting experiments in the province has been considered to be doubtful in view of the fact that it is not possible to select an average ten cent plot which would represent a crop spread over a considerable area on account of the great variations to be found between different tracts in a country of small holdings. No crop-cutting experiments were therefore conducted in the province during the quinquennium under review, and the district standards previously adopted have mostly been retained. There have however been some changes in the provincial standards due to the variations in the normal areas which are revised once in every three years on the basis of reports for the last three non-famine years in consultation with the District Officers. The principal changes in the provincial standards are an increase in the yield of ragi from 937 to 947 lbs, of tobacco from 1,165 to 1,203 lbs, and of cotton from 84 to 87 lbs; and a decrease in the yield of jowar from 571 to 564 lbs.

North-West Frontier Province.—As usual, three representative districts, viz., Hazara, Peshawar and Dera Ismail Khan were selected for the purpose of conducting crop experiments in the province. The experiments in the first two districts were, in accordance with the revised instructions, conducted by the members of the Agricultural Department, while those in the last-named district by the Revenue staff. Unfortunately, however, the crop returns supplied by the Agricultural Department were again incomplete, while the results of the experiments made by the Revenue staff in the Dera Ismail Khan district were considered to be unreliable as a guide to average outturn. The averages now reported have, however, been carefully scrutinised in consultation with the local officers and are believed to be correct. As a result of the present revision there has been a decrease in the yield of sugarcane from 2,761 to 2,477 lbs, of barley from 828 to 709 lbs and of maize from 1,124 to 1,023 lbs.

Punjab.—In the Punjab, the system of crop-cutting experiments has been recently revised and greatly improved. Formerly the experiments were made by the officers of the Agricultural Department in some districts, and by officers of the Revenue Department in others. But from 1930 both the departments have been conducting experiments separately in all districts except Simla. This system has resulted in a much larger number of experiments and has provided much more reliable data than in the past. Moreover, the results of the experiments after each harvest were carefully scrutinised jointly by the Director of Land Records and Director of Agriculture. In preparing the present return, the rates of yield fixed in the previous quinquennia or assumed for assessment purposes and the results of crop experiments made from time to time have all been considered along with the opinion of the local officers of the Revenue and Agricultural Departments before the yields were finally fixed. The latest revision shows a general decrease in the provincial averages. The important variations are a decrease in the yield of barley from 805 to 722 lbs, of jowar from 417 to 385 lbs, of gram from 616 to 585 lbs and of cotton (American) from 146 to 130 lbs. The yields of rice and maize have, however, been raised from 1,178 to 1,212 lbs and from 916 to 951 lbs, respectively. The average yield of the irrigated variety of tobacco has for the first time been fixed at 1,078 lbs per acre for the province.

APPENDIX A—continued

United Provinces.—In the quinquennium under review, crop-cutting experiments were, as usual, conducted in the representative districts of the province. The results obtained have necessitated revisions only in certain cases where the evidence accumulated was considered sufficient to justify a change. The principal changes are a decrease in the yield of wheat, maize and gram and an increase in the yield of sugarcane. The data on which these revisions are based are, however, considered by the provincial Director of Agriculture to be not very reliable and the method of crop-cutting experiments is, it is reported, under revision.

Mysore.—As a result of the experiments conducted during the quinquennium under review, the yields of rice, sugarcane and cotton have been lowered while those of ragi, horse-gram and sesamum raised. The important changes are an increase in the yield of ragi from 699 to 1,016 lbs, of sesamum from 281 to 411 lbs and a decrease in the yield of sugarcane from 3,847 to 3,639 lbs.

NOTE—(1) Average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, and the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.

(2) The superseded figures of the previous four quinquennia have been inserted merely to show the trend of the revision made in each period. The variations in the figures of yield of crops now reported as compared with previous ones are due to the fact that the averages have been worked out not approximately as before, but accurately.

	1,055		564		494		947					87				

NOTE.—The figures of yield are taken from the Season and Crop Report of Madras for 1930-31.

* The figures of normal yield per acre in the South have been arrived at with reference to the distribution of the several varieties and hence the vary from year to year according to the distribution. Figures of average yield per acre for each variety are irrigated Cambodia 250 lbs; irrigate Karunganni in Coimbatore 150 lbs; dry Cambodia 80 lbs in Salem, Coimbatore and Trichinopoly; 100 lbs in Madura, Ramnad and Tinnevely; 50 lb elsewhere; Uppam 65 lbs; dry Karunganni in Coimbatore 85 lbs, Nadam and Bourbon 20 lbs, and Tinnevelles 110 lbs.

(a) The yield reported in unhusked grain has been reduced by 33 per cent in the case of rice, 15 per cent in the case of jowar, 20 per cent in the case of bajra, 10 per cent in the case of ragi and 10 per cent in the case of millets.

APPENDIX B

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA

- Ajaji, ajaji, or ajili* (*Setaria grapholera*)—A vegetable crop.
- Ajmal* (*Carum Rosburghianum*)—A kind of spice.
- Ajwan* (*Carum copticum*)—A kind of spice, "Bishop's weed".
- Akarkara or jera, li* (*Chrysoliza coriandrum*)—A food-crop.
- Anada or masuli allari* (*Carum anada*)—A condiment.
- Amfazhau* (*Spondias manguifera*)—The hog plum.
- Arhar* (*Cajanus indicus*)—The pigeon pea.
- Arandli* (*Phyllanthus distictus*)—Country star gooseberry.
- Bajra* (*Pennisetum typhifolium*)—The spiked millet.
- Band* (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Barbati* (*Fijna caljanj*)—Asparagus, a food grain.
- Barti* (see Wudatu).
- Bel* (*Egle Marmelos*)—A fruit.
- Bhagdari* (see Narvadari).
- Bilimli* (*Acerroha Bilimli*)—A fruit.
- Bimb* (*Cephalandra indica*)—A fruit.
- Chaplask* (*Artocarpus Chaplaskia*)—A tree grown mainly for timber.
- Chayroot* (*Oldenlandia umbellata*)—A dye.
- Cheena* (*Panicum miliaceum*)—The common millet.
- Cheik* (*Coix lachryma-jobi*)—A food grain, "Job's Tear".
- Chikkudukayalu* (*Dolichos lablab*)—The Indian or papat bean.
- Cholam* (see Jowar).
- Cholanathu* (*Andropogon sorghum*)—Fodder jowar.
- Chouli* (see Barbati).
- Cumbu* (see Bajra).
- Dani* (*Nipa fruticans*)—A scabiferous palm, the leaves of which are used for thatching purposes, also for matting.
- Duo-tar* (Assam)—A tax levied in Sylhet upon male Tepperas who cultivate by jhumming.
- Dhaincha* (*Sesbania aculeata*)—A plant cultivated mainly for green manure.
- Dhatura* (*Datura alba*)—A drug.
- Dividivi* (*Casalpinia coriaria*)—A tanning material.
- Dolois* (Assam)—The Headman of a group of villages in the Jowai Sub-division of the Khasi and Jaintia Hills district.
- Gajar*—Carrot.
- Garnal* (*Coleus barbatus*)—A fruit.
- Gondli* (see Kutki).
- Gorait* (United Provinces)—Village watchman.
- Henna* (*Lawsania alba*)—A dye.
- Indas* (Madras)—Alienated villages or lands granted rent-free. *Whole indas* villages are entire villages held on such tenure; *minor indas* are portions of villages, generally a number of fields, held on *indas* tenure.
- (Coorg)—A grant of land by Government as a reward for services rendered or for religious or charitable purposes.
- Isfagul* (*Plantago orata*)—A drug.
- Istamdrari* (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- Isfat* (Bombay)—A form of service tenure.
- Isdra* (Berar)—Land leased under the waste-land rules on stipulated terms.
- Jagir* (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jamlo or nardil*—Black plum.

APPENDIX B—continued.

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued.

Jamma (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

Jenuugulu—Asparagus.

Jinjili (*Sesamum indicum*)—An oilseed.

Jira—Caraway.

Joli (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.

Jowar (*Sorghum vulgare*)—The great millet.

Kalpayaru—Kidney bean.

Kangni (*Panicum Italicum*)—Italian millet.

Kamranga (*Averrhoa Carambola*)—A fruit.

Kanda (*Dracontium*)—A vegetable crop.

Kankrol (*Momordica cochinchinensis*)—A vegetable crop.

Kurula (*Momordica Charantia*)—A vegetable crop.

Karuvapilai (*Murraya Koenigii*)—A condiment.

Kavali (*Sterculia urens*)—The Indian katura, a fruit.

Karathu (*Dioscorea alata*)—A tuber used as a food stuff.

Khálsa (Bombay)—Government occupancy or raiyatwari tenure.

—(Central Provinces)—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari.

—(Berar, Ajmer-Merwara)—Land paying full revenue to Government.

Khatedar (Berar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

Khiraj (Assam)—Land assessed to full revenue.

Khoti (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

Kirni (*Mimusops hexandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.

Kodo or *Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.

Kolinji (*Tephrosia purpurea*)—A drug.

Koorka (*Strobilanthes*)—A vegetable crop.

Korai—The Indian matting sedge.

Kuhudi (*Panicum trypheron*)—A food grain.

Kulthi (*Dolichos biflorus*)—Horse gram.

Kutki (see *Kodo*).

Kwin (Burma)—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.

Lakhiraj (Assam)—Revenue-free land.

Lobia (see *Barbati*).

Madder (*Rubia tinctorum* and *R. cordifolia*)—A dye.

Mahalkari (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.

Makhan sim—The sword bean.

Malguzari (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.

Mamlatdar (Bombay)—The chief revenue and police officer (native) in charge of a taluk.

Mankachu (*Mocasia indica*)—A root crop.

Marua (*Elusine coracana*)—A kind of millet.

Marukkolundu (*Artemisia vulgaris*)—The Indian worm wood.

Mehcasi (Bombay)—A proprietary tenure assessable to revenue at a lump sum.

Muafi (Munpur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.

Mung (*Phaseolus Mungo*)—Green gram.

APPENDIX B—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

- Munsiri* (Berar)—A local native revenue officer.
- Narisari, Bhajdari* (Bombay)—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump and in the latter distributed by rates over fields.
- Neara or Margosa* (*Melia azadirachta*)—A non-food crop.
- Neroli* (*Gaultheria odorata*)—An oilseed.
- Nela madaia* (*Solanum xanthocarpum*)—The begonia brinjal, a drug.
- Nisfakiraj* (Assam)—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Osamula* (*Ochlosandra Baccata*)—A reed.
- Ol or zaminkand*—The elephant foot, a root crop.
- Palamjat* (Berar)—Land held on payment of a quit-rent, but not necessarily hereditary.
- Panchayat* (Bengal)—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.
- Papay* (*Carica papaya*)—A fruit.
- Parpatigar* (Coorg)—A revenue officer in charge of a sub-division of a taluk.
- Parwar* (see Patol).
- Patel* (Coorg)—Village headman appointed by Government.
- Patol* (*Trichosanthes dioica*)—A vegetable crop.
- Peshkash* (Madras)—The fixed land revenue payable to Government on all permanently settled estates.
- Pinakottai or pouna*—The mast wood.
- Ponnagantikura* (*Alternanthera versilis*)—A vegetable crop.
- Poramboke* (Madras)—Lands reserved for public or village communal purposes.
- Pot lands* (Bombay)—Plots of alienated land in Khalsa villages.
- Pot kharda* (Berar)—The unculturable area included in a survey number.
- Puliyavara* (*Oxalis corniculata*)—A vegetable crop.
- Ragi* (see Marua).
- Randhuni* (see Ajmud).
- Rayatwari*—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.
- Sabai grass* (*Ischaemum Augustifolium*)—A fibre plant.
- Sankulu* (*Pachyrhizus angulatus*)—A root crop.
- Sapodilla* (*Achras Sapota*)—A fruit.
- Sebestan* (*Cordia Myra*)—A fruit.
- Shanthy* (Coorg)—A village accountant appointed by Government.
- Shrotriya* (Madras)—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Siris tree or vagai* (*Albizia Lebbek*)—A non-food crop.
- Sorrell* (*Rumex vesicarius*)—A vegetable crop.
- Sother*—Radish.
- Swank* (*Panicum frumentaceum*)—A food grain.
- Taikthagy*—The headman of a group of villages.
- Talukdari* (Bombay)—A form of proprietary right in force in the northern districts of Bombay.
- Tojpat* (*Cinnamomum Tamala* and *C. obtusifolium*)—A spice.
- Thakameda* (Upper Burma)—Household tax.
- Thattai pajara* (see Barbat).
- Thakdar* (Central Provinces)—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Thetke grass* (*Imperata crassifoliosa*)—A small perennial grass used chiefly for thatching purposes.

APPENDIX B—concluded

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—concluded

Thuggi (Burma)—A village headman.

Til (*Sesamum indicum*)—An oilseed.

Uekhe (*Momordica muricata*)—A vegetable crop.

Udai (*Acacia eburnea*)—A thorny tree used as fuel or for fencing purposes.

Udhad-jamabandi (Bombay)—A proprietary tenure subject to fixed assessment.

Umbli (Coorg)—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Unda (*Pongamia glabra*)—An oilseed.

Urad (*Phaseolus radiatus*)—Black gram.

Wudalu or barti (*Panicum flavidum*)—A food grain.

Zamindar—The holder of an estate on a fixed assessment under a deed of permanent ownership granted by Government.

——— (Central Provinces)—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Zamindari—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.

——— (United Provinces)—An undivided estate held in joint tenure.

APPENDIX C

ALPHABETICAL LIST OF CROPS CULTIVATED IN INDIA AND THEIR CLASSIFICATION IN TABLE IV

NAME OF CROP		Reference to Table IV
English or Vernacular	Botanical	
Agasi, agati or avati	<i>Sesbania grandiflora</i>	10. Fruits and Vegetables including root crops.
Agave	<i>Agave</i> spp.	25. Fibres—others.
Ajmod or Baidhuni	<i>Carum Roxburghianum</i>	29. Condiments and Spices.
Ajwan or Bishop's weed	<i>Carum Copticum</i>	37. Drugs and Narcotics—others.
Alukura (<i>see</i> Chrysanthemum)
Al (<i>see</i> Morinda)
Alcea	<i>Moe vera</i>	37. Drugs and Narcotics—others.
Alya (<i>see</i> Cress)
Amada or Mamidi allam	<i>Curcuma Amada</i>	29. Condiments and Spices.
Amaranth	<i>Amarantus</i>	11. Miscellaneous food crops.
Ampazham (<i>see</i> Plum)
Anise seed	<i>Pimpinella Anisum</i>	29. Condiments and Spices.
Apple, wood	<i>Feronia elephantum</i>	10. Fruits and Vegetables including root crops.
" Rose	<i>Eugenia Jambos</i>	10. " " "
" Custard	<i>Annona squamea</i> and <i>A. reticulata</i>	10. " " "
Areca nut or Betelnut	<i>Areca Catechu</i>	37. Drugs and Narcotics—others.
Arhar or pigeon pea	<i>Cajanus indicus</i>	10. Other food grains, etc.
Arnatto or Arnotto	<i>Bixa Orellana</i>	30. Dyes and Tanning Materials—others.
Arrowroot, West Indian	<i>Maranta arundinacea</i>	11. Miscellaneous food crops.
" Wild or East Indian	<i>Curcuma augustifolia</i>	11.
Artichoke	<i>Cynara Scolymus</i> or <i>Centaurea Cardunculus</i>	10. Fruits and Vegetables including root crops.
Arum (edible), Kachu or Kachalu	<i>Colocasia Antiquorum</i>	10. " " "
Arunelli (<i>see</i> Gooseberry, country star)
Bajra (<i>see</i> Millet)
Barbati, Lobia, Jenugulu, Thattan-payara or Chowli (Asparagus)	<i>Vigna Catjang</i>	10. Other food grains, etc.
Barley	<i>Hordeum vulgare</i>	4. Barley.
Barti (<i>see</i> Wudalu)
Basil, sweet	<i>Ocimum Basilicum</i>	37. Drugs and Narcotics—others.
Beans—		
" Sim	<i>Canavalia</i> sp.	10. Fruits and Vegetables including root crops.
" Sutri or Ghurush	<i>Phaseolus calcaratus</i>	10. Other food grains, etc.
" Asparagus (<i>see</i> Barbati)
" Cluster (<i>see</i> Vetch)
" French or Haricot	<i>Phaseolus vulgaris</i>	10. Other food grains, etc.
" Garden	<i>Vicia Faba</i>	10. Fruits and Vegetables including root crops.
" Goa	<i>Psopocarpus tetragonolobus</i>	10. " " "
" Indian, Chikkudukayalu, Popat or Val	<i>Dolichos Lablab</i>	10. Other food grains, etc.
" Kidney, Moth or Kalpayaru	<i>Phaseolus acutifolius</i>	10. " " "
" Lima	" <i>Lunatus</i>	10. " " "
" Soy	<i>Glycine hispida</i>	10. " " "
" Sword or Makhan Sim	<i>Canavalia Ensiformis</i> , C.	10. Fruits and Vegetables including root crops.
" Velvet	<i>Mucuna Pruriens</i>	10. " " "
Beetroot	<i>Beta vulgaris</i>	10. " " "
Bel	<i>Egle Marmelos</i>	10. " " "
Betel vine	<i>Piper Betle</i>	37. Drugs and Narcotics—others.
" nut (<i>see</i> Arecanut)
Bhindi (<i>see</i> Hibiscus, edible)
Bilimbi	<i>Averrhoa Bilimbi</i>	10. Fruits and Vegetables including root crops.
Bimb	<i>Cephalandra indica</i>	10. " " "

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Bishop's weed (<i>see</i> Ajwan)
Borage, country	<i>Coleus aromaticus</i>	37. Drugs and Narcotics— others.
Brinjal	<i>Solanum Melongena</i> , S. longum.	40. Fruits and Vegetables— including root crops.
„ bogoda or nela mulaka	<i>Solanum xanthocarpum</i>	37. Drugs and Narcotics— others.
Buck wheat (<i>see</i> Wheat)
Cabbage	<i>Brassica oleracea</i>	40. Fruits and Vegetables— including root crops.
Caraway or Jira	<i>Carum Carui</i>	20. Condiments and Spices.
„ Black or Shahjira	„ <i>Bulbocastanum</i>	20. „ „ „
Cardamom Aromatic	<i>Amomum aromaticum</i>	20. „ „ „
„ greater	„ <i>subulatum</i>	20. „ „ „
„ lesser	<i>Elettaria Cardamomum</i>	20. „ „ „
Carob or Locust tree	<i>Ceratonia Siliqua</i>	39. Fodder crops.
Carrot or Gajar	<i>Daucus Carota</i>	40. Fruits and Vegetables— including root crops.
Cashew nut	<i>Anacardium occidentale</i>	40. „ „ „
Cassava	<i>Manihot utilisima</i> and <i>M. palmata</i> .	40. „ „ „
Castor	<i>Ricinus communis</i>	17. Castor.
Cauliflower	<i>Brassica oleracea</i>	40. Fruits and Vegetables— including root crops.
Celery	<i>Apium graveolens</i>	40. „ „ „
Chaplash (<i>see</i> Sam tree)
Chayroot	<i>Oldenlandia umbellata</i>	30. Dyes and Tanning Materials—others.
Cheena (<i>see</i> Millet)
Cheik (<i>see</i> Job's Tear)
Chicory	<i>Cichorium Intybus</i>	40. Fruits and Vegetables— including root crops.
Chickling Vetch (<i>see</i> Vetch)
Chillies	<i>Capsicum sp.</i>	20. Condiments and Spices.
Chikkudukayalu (<i>see</i> Beans, Indian)
Cholum (<i>see</i> Millet)
Cholanathu (fodder Cholum)	<i>Andropogon Sorghum</i>	39. Fodder crops.
Chowli (<i>see</i> Barbati)
Chrysanthemum, Akurkura, or Jevandi	<i>Chrysanthemum corona-</i> <i>rium.</i>	42. Miscellaneous non-food crops.
Cinchona	<i>Cinchona sp.</i>	35. Cinchona.
Cinnamon	<i>Cinnamomum zeylanicum</i>	20. Condiments and Spices.
Citron or lime or lemon	<i>Citrus medica</i>	40. Fruits and Vegetables— including root crops.
Cloves	<i>Eugenia caryophyllata</i> or <i>Caryophyllus aromaticus.</i>	20. Condiments and Spices.
Coconut	<i>Cocos nucifera</i>	16. Coconut.
Coffee	<i>Coffea arabica</i>	32. Coffee.
Coriander	<i>Coriandrum sativum</i>	20. Condiments and Spices.
Cotton	<i>Gossypium sp.</i>	23. Cotton.
Cress or Alya	<i>Lepidium sativum</i>	40. Fruits and Vegetables— including root crops.
Cucumber	<i>Cucumis sativus</i>	40. „ „ „
Cumbu (<i>see</i> Millet)
Cumin	<i>Cuminum Cyminum</i>	20. Condiments and Spices.
Custard Apple (<i>see</i> Apple)
Dani	<i>Nipa fruticans</i>	42. Miscellaneous non-food crops.
Date palm (<i>see</i> Palm)
Dhaincha	<i>Sesbania aculeata</i>	42. Miscellaneous non-food crops.
Dhatara	<i>Datura alba</i>	37. Drugs and Narcotics— others.
Dill or Sowa	<i>Pencedaunum graveolens</i>	18. Oilseeds—others.

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Jenugulu (<i>see</i> Barbati)
Jevandi (<i>see</i> Chrysanthemum)
Jinjili (<i>see</i> Sesamum)
Jira (<i>see</i> Caraway)
Job's Tear or Cheik	<i>Coix lachryma-jobi</i>	10. Other food grains, etc.
Jowar (<i>see</i> Millet)
Jujube	<i>Zizyphus Jujuba</i>	40. Fruits and Vegetables including root crops.
Jute	<i>Corchorus</i> sp.	24. Jute.
Kachu or Kachalu (<i>see</i> Arum)
Kakri (<i>see</i> Melon)
Kalparyu (<i>see</i> Beans, Kidney)
Kamranga	<i>Averrhoa Carambola</i>	40. Fruits and Vegetables including root crops.
Kanda	<i>Dracontium</i>	40. " "
Kangni (<i>see</i> Millet)
Kankrol	<i>Momordica cochinchinensis</i>	40. Fruits and Vegetables including root crops.
Kaon (<i>see</i> Millet)
Kapok	<i>Eriodendron anfractuosum</i>	25. Fibres—others.
Karola	<i>Momordica Charantia</i>	40. Fruits and Vegetables including root crops.
Karuvapilai	<i>Murraya Koenigii</i>	20. Condiments and Spices.
Kavali or Indian Katura	<i>Sterculia urens</i>	40. Fruits and Vegetables including root crops.
Kavathu, pannikkavathu, pallakavathu, kolkavathu	<i>Dioscorea alata</i>	40. " " "
Kharbuja (<i>see</i> Melon)
Khesari (<i>see</i> Vetch)
Khurfa (<i>see</i> Purslane)
Kidney bean (<i>see</i> Bean)
Kirni	<i>Mimusops hexandra</i>	41. Miscellaneous food crops.
Kodo (<i>see</i> Millet)
Korai (<i>see</i> Matting sedgo, Indian)
Kokam (<i>see</i> Mangosteen)
Koijinj or vempali	<i>Tephrosia purpurea</i>	37. Drugs and Narootics— others.
Koorka	<i>Strobilanthes</i>	40. Fruits and Vegetables including root crops.
Kuhudi	<i>Panicum trypheron</i>	10. Other food grains, etc.
Kulthi (<i>see</i> Gram)
Kutki (<i>see</i> Millet)
Lemon (<i>see</i> Citron)
Lentils	<i>Lens esculenta</i> or <i>Ervum lens</i>	10. Other food grains, etc.
Lettuce	<i>Lactuca Scariola</i>	40. Fruits and Vegetables including root crops.
Lime (<i>see</i> Citron)
Linseed	<i>Linum usitatissimum</i>	12. Linseed.
Lobia (<i>see</i> Barbati)
Locust tree (<i>see</i> Carob)
Lucerne	<i>Medicago sativa</i>	39. Fodder crops.
Madder	<i>Rubia tinctorum</i> and <i>R. cordifolia</i> .	30. Dyes and Tanning Materials—others.
Mahua	<i>Bassia latifolia</i> and <i>B. longifolia</i> .	41. Miscellaneous food crops.
Maize	<i>Zea Mays</i>	8. Maize.
Makham Sim (<i>see</i> Beans, Sword)
Mango	<i>Mangifera indica</i>	40. Fruits and Vegetables including root crops.
Mangosteen or Kokam	<i>Garcinia indica</i>	10. " " "
Mankachu	<i>Alocasia indica</i>	40. " " "
Margosa or Neem tree	<i>Melia azadirachta</i>	42. Miscellaneous non-food crops.

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

Name of Crop		Horticultural Classification in Table IV
English or Vernacular	Botanical	
Marians	<i>Bouea burmanica</i>	40. Fruits and Vegetables including root crops.
Margosam	<i>Origanum vulgare</i>	20. Condiments and Spices.
Marua (<i>see</i> Millet)
Marukkolundu or Indian wormwood	<i>Artemisia vulgaris</i>	12. Miscellaneous non-food crops.
Mast wood	<i>Calophyllum inophyllum</i>	18. Oilseed—others.
Mati kalai (<i>see</i> Black gram)
Matting sedge, Indian or Korai	<i>Cyperus corymbosus</i> , C. tegetum.	25. Fibres—others.
Medlar, Indian	<i>Vangueria edulis</i>	40. Fruits and Vegetables including root crops.
Melon, Kharbuja	<i>Cucumis Melo</i>	40. " " "
" Kakri	<i>Cucumis Melo</i> var. <i>momordica</i>	40. " " "
" Musk	<i>Cucurbita moschata</i>	40. " " "
" Water	<i>Citrullus vulgaris</i>	40. " " "
" White Gourd (<i>see</i> Gourd)
Metha (Fenugreek)	<i>Trigonella foenum-graceum</i>	20. Condiments and Spices.
Millet, Bulrush, Bajra or Cumbu	<i>Pennisetum typhoides</i>	6. Cumbu or Bajra.
" (Sorghum) or jowar or cholam	<i>Sorghum vulgare</i>	5. Cholam or Jowar.
" Italian, Kangni, or Kaon	<i>Panicum italicum</i> or <i>Setaria italica</i>	19. Other food grains, etc.
" Kodo or Varagu	<i>Paspalum scrobiculatum</i>	10. " "
" Little, Kutki or Gondli	<i>Panicum miliare</i>	10. " "
" Marua or Ragi	<i>Eleusine Coracana</i>	7. Ragi or marua.
" Common or Cheena	<i>Panicum miliaceum</i>	10. Other food grains, etc.
Mint or Pudina	<i>Mentha arvensis</i>	20. Condiments and Spices.
Morinda or Al	<i>Morinda tinctoria</i>	30. Dyes and Tanning Materials—others.
Moth (<i>see</i> Bean)
Mulberry	<i>Morus indica</i>	12. Miscellaneous non-food crops.
Mung (<i>see</i> Gram)
Mustard	<i>Brassica</i> sp.	14. Rape and Mustard.
Naval (<i>see</i> Plum, black)
Neem tree (<i>see</i> Margosa)
Neerali	<i>Gynocordia odorata</i>	18. Oilseed—others.
Niger Seed or Sorguja	<i>Guizotia abyssinica</i>	18. " "
Nutmeg	<i>Myristica fragrans</i>	20. Condiments and Spices.
Oats	<i>Avena sativa</i>	39. Fodder crops.
Odumula (reeds)	<i>Ochlandra Rheedii</i>	12. Miscellaneous non-food crops.
Ol (<i>see</i> Elephant foot)
Onion	<i>Allium Ceba</i>	40. Fruits and Vegetables including root crops.
Opium	<i>Papaver somniferum</i>	31. Opium.
Orache, garden (<i>see</i> Spinach)
Oranges	<i>Citrus Aurantium</i>	40. Fruits and Vegetables including root crops.
Palm, Date	<i>Phoenix sylvestris</i>	22. Sugar—others.
" Palmyra	<i>Borassus flabellifer</i>	22. " "
Papay	<i>Carica papaya</i>	40. Fruits and Vegetables including root crops.
Parvar or Patol	<i>Trichosanthes dioica</i>	40. " " "
Peach	<i>Prunus persica</i>	40. " " "
Peas	<i>Pisum sativum</i> or <i>Pisum</i> <i>arvense</i>	10. Other food grains, etc.
Peanut (<i>see</i> Groundnut)
Pepper	<i>Piper</i> or <i>Capsicum</i>	20. Condiments and Spices.
" Black	<i>Piper nigrum</i>	20. " " "
" Long	<i>Piper longum</i>	20. " " "
Pigeon or bottle grass	<i>Setaria glauca</i>	19. Other food grains, etc.
" pea (<i>see</i> Arhar)
Pigmakottai, Pouna (<i>see</i> Mastwood)

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Pine apple	Ananas sativa	40. Fruits and Vegetables including root crops.
Plantain	Musa sapientum	40. " " "
Plum, black, Jambo tree or Naval	Eugenia Jambolana	40. " " "
" Hog, or Ampazham	Spondias mangifera	40. " " "
Poi (see Spinach)
Pomegranate	Punica granatum	40. Fruits and Vegetables including root crops.
Pomelo	Citrus decumana	40. " " "
Ponnagantikura	Alternanthera sessilis	40. " " "
Potato	Solanum tuberosum	40. " " "
" Sweet	Ipomœa Batatas, Batatas edulis.	40. " " "
Pudina (see Mint)
Puliyavara	Oxalis corniculata	40. Fruits and Vegetables including root crops.
Pumpkin	Cucurbita pepo	40. " " "
" Melon (see Gourd red)
Purslane	Portulaca Oleracea	40. Fruits and Vegetables including root crops.
Radish or Sother	Raphanus sativus	40. " " "
Ragi (see Millet)
Randhuni (see Ajmud)
Rapeseed	Brassica sp.	14. Rape and Mustard.
Raspberry	Rubus lasiocarpus	40. Fruits and Vegetables including root crops.
Rhea	Boehmeria nivea	25. Fibres—others.
Rice	Oryza sativa	2. Rice.
Rose apple (see Apple)
Roselle	Hibiscus sabdariffa	40. Fruits and Vegetables including root crops.
Rubber (India)	Hevea brasiliensis, Manihot Glaziovii.	42. Miscellaneous non-food crops.
Sabai grass	Ischœmum angustifolium	25. Fibres—others.
Safflower	Carthamus tinctorius	30. Dyes and Tanning Materials—others.
Saffron	Crocus sativus	30. " " "
Sage	Salvia officinalis	20. Condiments and Spices.
Sam tree or Chaplash	Artocarpus Chaplasha	42. Miscellaneous non-food crops.
Sank-alu	Pachyrhizus angulatus	40. Fruits and Vegetables including root crops.
Sapodilla	Achras Sapota	40. " " "
Sawan (see Swank)
Sebestan	Cordia myxa	40. Fruits and Vegetables including root crops.
Senna	Cassia angustifolia and C. ovata.	37. Drugs and Narcotics— others.
Sesamum, til or jinjili	Sesamum indicum	13. Sesamum.
Shahjira (see Caraway, black)
Shama (see Swank)
Singhara or water caltrop	Trapa bispinosa	40. Fruits and Vegetables including root crops.
Siris tree or vagai	Albizzia Lebbeck	42. Miscellaneous non-food crops.
Sisal hemp (see Hemp)
Soapnut or Kumkudu-Kaya	Sapindus trifoliatus	42. Miscellaneous non-food crops.
Sorguja (see Niger seed)
Sorrel	Rumex vesicarius	40. Fruits and Vegetables including root crops.
Sowa (see Dill)
Sother (see Radish)

APPENDIX C—concluded

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Notes	Basis of Classification see Table IV
English or Vegetables	Native		
Soy bean (<i>see</i> Bean)
Spelt wheat (<i>see</i> Wheat)
Spinach	Spinacea oleracea	10. Fruits and Vegetables including root crops.	
" Indian or poi	Basella alba	10. " " "	
" Mountain, or Garden Orache	Atriplex hortensis	10. " " "	
Strawberry	Fragaria vesca	10. " " "	
Sugarcane	Saccharum officinarum	21. Sugarcane	
Sunflower	Helianthus Annuus	18. Oils etc.—others.	
Swallow-wort	Cakile sp.	25. Fibres—others.	
Swank, Sawan, or Shama	Panicum frumentaceum	10. Other food grains, etc.	
Sweet flag	Acorus Calamus	37. Drugs and Narcotics— others.	
Sweet potato (<i>see</i> Potato)	
Tamarind	Tamarindus indica	20. Condiments and Spices.	
" Manila	Pithecolobium dulce	40. Fruits and Vegetables including root crops.	
Taramira	Eruca sativa	11. Rape and Mustard.	
Tea	Camellia Thea	33. Tea.	
Tejpat	Cinnamomum Tamala and C. obtusifolium.	20. Condiments and Spices.	
Tepari (<i>see</i> Gooseberry)	
Thattan-payara (<i>see</i> Barbati)	
Thetkè (grass)	Imperata arundinacea	42. Miscellaneous non-food crops.	
Til (<i>see</i> Sesamum)	
Tobacco	Nicotiana Tabacum and N. Rustica.	34. Tobacco.	
Tomato	Lycopersicon esculentum	10. Fruits and Vegetables including root crops.	
Tori, Toria	Brassica Napus	11. Rape and Mustard.	
Turnerie	Curcuma longa	20. Condiments and Spices.	
Turnip	Brassica Rapa	10. Fruits and Vegetables including root crops.
